S-BPM ONE: Setting the Stage for Subject-Oriented Business Process Management Hagen Buchwald, Albert Fleischmann, Detlef Seese, Christian Stary, 2010-11-19

This volume contains a selection of papers from the First Workshop on Subject Oriented Business Process Management

S BPM ONE Establishing a multi and cross disciplinary interchange of underlying and applied concepts

successful application studies and innovative development ideas

the workshop emphasized the proactive realization of role or actor oriented modeling on the basis of exchanging messages when accomplishing tasks

The workshop was organized as a forum for the discussion of foundations achievements reflections and further developments

In this way its contributions not only addressed the current state of the art but also the various lines of research and development either running or planned

The state of the art is reflected in terms of concepts modeling language and tool features on the one hand

On the other hand it is reflected through the discussion of industrial case studies

These indicate the current practice when implementing the subject oriented BPM paradigm in industrial settings

By challenging conceptual foundations they also allow us to define a common ground for future developments in research and practice

The S BPM ONE contributions focus on challenges arising from the evolution of service oriented architectures and the need for more flexible business organizations

The latter require coherent and adaptive representation and processing techniques for business process modeling and execution

Corresponding technologies have to be grounded in theories of computer science in order to provide an adequate infrastructure for thorough BPM including technology enhanced change management
