Mid Term Planning Very Hungry Caterpillar:

Planning an Appropriate Curriculum in the Early Years Rosemary Rodger, 2013-04-03 The foundation stage has a fundamental role in the laying of foundations for children's learning. In this new edition the author uses a wide range of material including research evidence to offer an additional dimension to work currently taking place in the Foundation Stage. Each chapter includes the early learning goals for the majority of children and advice on providing for each area of learning: personal, social and emotional development; language and literacy; mathematics; knowledge and understanding of the world; and physical and creative development. Students training to be specialist early years teachers and those already working in the sector will welcome this up-to-date guide to planning and providing for high quality learning experiences for children under five. With case studies of good practice, practical help in writing an early years policy and guidance on assessment and devising an effective post-inspection plan, this is a truly comprehensive guide to planning and implementing an appropriate curriculum for the under fives.

Teaching Across the Early Years 3-7 Hilary Cooper, Chris Sixsmith, 2004-11-23 This practical and accessible book explores ways of developing continuity and coherence in children's learning from three to seven years old. It is based around three case studies in which tutors on Initial Teacher Training courses worked with early years practitioners in three different pre-school settings, each linked to a primary school. The book describes how they successfully managed to plan and teach integrated themes across the age range in the context of the requirements of the Foundation Stage and the National Curriculum. Each case study has a different focus: science, design and technology, the arts, including an ICT strand, the humanities, including a physical education strand. English and mathematics dimensions run through each theme. The book is alive with discussion of children's art, language, drama and music, captured as field notes, writing, drawing and as video tape. Each chapter concludes with suggestions of ways in which readers can develop the ideas in their own contexts. This book will be invaluable reading for students on Early Years courses, Early Years practitioners and tutors and mentors in early childhood education.

The Really Useful Book of ICT in the Early Years Harriet Price, 2012-11-12 Practitioners and students wishing to know how very young children develop an awareness of ICT will find this text invaluable. ICT has arguably one of the biggest impacts on every day 21st century life, so its inclusion in the Early Years Foundation Stage curriculum reflects the need to encourage forward-looking practice in classrooms and nurseries. This book enables you to help young children develop their knowledge, understanding and skill in the use of ICT, with chapters from contributors with a wide range of practical experience. Full of ideas and new thinking, this practical guide shows you how to promote independence in children's use of ICT through resources like digital cameras and role-play toys, explore the nature of creativity through ICT, using it to support the more traditional areas of art, music, dance and writing, use ICT to enhance the physical and sensory aspects of outdoor learning experiences, harness the potential of ICT in reaching children with a variety of different learning needs, particularly those with profound and multiple learning difficulties or autistic.

spectrum disorders value children's home experiences of ICT and build on what they already know and how to work with parents in developing their child's ICT capability. ICT can underpin all areas of learning for young children. This highly practical, inspirational and informative text is therefore relevant to all practitioners and students training in Early Years education.

Improving Teaching and Learning In the Core Curriculum Kate Ashcroft, Professor Kate Ashcroft, John Lee, 2005-08-16 Focusing on the core subjects of Mathematics, English and Science, the book addresses the political agenda in which the core curriculum takes place and provides practical information and guidance on teaching the three subjects. The book briefly traces the history of these core subjects, examines what is meant by curriculum knowledge, takes apart the classroom and educational issues before offering advice on handling curriculum change and tackling new approaches to teaching. It helps teachers develop their skills through enquiry tasks, case studies, questions and suggested further reading.

Access to Science Claire Marvin, Chris Stokoe, 2021-12-24 This accessible and practical teaching resource focuses on access to the science curriculum for pupils with learning difficulties. Within an inclusive framework of participation and achievement for all, the core of the book provides support and ideas for the effective planning and implementation of well-differentiated science-focused activities. The book offers activities that are designed to motivate and challenge pupils with diverse individual needs, guidance on differentiation in early years and across all key stages, suggestions for teaching early developmental skills through sensory science, defined learning outcomes that demonstrate progression in curriculum content and experience, assessment and recording opportunities and guidance on how to incorporate science in a cross-curricular way. Written by authors who have direct experience in the field, this book will provide practical help to all those working with pupils with learning difficulties in early years settings and in mainstream and special schools.

Supporting Learning and Teaching Christine Bold, 2013-08-21 An edited collection, this volume covers the full range of themes and issues relevant to teaching assistants studying on a foundation degree course. The contributors explore the relationship between practical educational ideas and current academic debates to develop an overview of the issues involved.

Planning an Appropriate Curriculum for the Under Fives Rosemary Rodger, 1999 A guide to planning and providing for high quality learning experiences for children under five. The author advises on providing for each area of learning and outlines the early learning goals which establish expectations for the majority of children. Case studies of good practice are included.

Diploma in Child Care and Education Penny Tassoni, 2002 Diploma in Child Care and Education is clearly written and covers all the underpinning knowledge in CACHE Certificate in Child Care and Education.

BTEC National Early Years Penny Tassoni, 2006 A core textbook mapped to the specifications for BTEC National Early Years.

Teaching Science in the Primary Classroom Hellen Ward, Judith Roden, Claire Hewlett, Julie Foreman, 2008-08-21 This exciting new edition of a popular book offers the reader the following new elements: explicit advice on how to link science to cross-curricular learning; updated advice on planning and assessment; guidance on how to accommodate personalised learning within science; more on

games to use in science more on creativity more on questioning techniques an important aspect of scientific enquiry a whole new chapter on using ICT to teach science There are lots of practical examples and clear guidance on how to turn theory into creative and lively science lessons and activities Examples of children s work are included and there are plenty of helpful case studies Hellen Ward is Senior Lecturer at Canterbury Christ Church University a widely published author and a frequent presenter at conferences Judith Roden is Principal Lecturer at Canterbury Christ Church University and a successful author Claire Hewlett and Julie Foreman are both Senior Lecturers at Canterbury Christ Church University
