Overcoming Fragmentation in Southeast Europe Panayiotis Getimis, 2017-11-28 With the expansion of the European Union the countries of Southeast Europe have finally been brought together within one socio political entity The restructuring of these economies following globalization and neoliberalization has meant that this region has become much more open to geopolitical shifts and trends While the various countries have all entered into the slow process of European integration the historic fragmentation of this region has led to various conflicts and contradictions in the restructuring and transition of national economies This volume provides a theoretical and comparative overview which examines the prospects for spatial cohesion in this region With the need to handle persisting problems and conflicts from the past while coping with new economic and political structures Southeast Europe proves to be a challenging yet fruitful testing ground for how best to overcome fragmentation and establish a long term process of social and economic integration *Strategic Planning for*

Contemporary Urban Regions Alessandro Balducci, Valeria Fedeli, Gabriele Pasqui, 2016-04-01 This book is an account of how the Milan Provincial Administration and a team of researchers from Milan Polytechnic worked together to develop a new Strategic Plan for Milan's urban region Informed by innovative conceptions of both how to understand cities in the contemporary world and engage in strategic planning work this experience has already attracted considerable international attention The authors now consolidate their contribution into a comprehensive account which continually relates theory and practice Examining the Milan Plan in detail the book explains the profound transformations which put great pressure on the traditional descriptive tools so planners must engage in the production of new ones It also proposes that these transformations affect the way in which urban policies and planning processes are designed The project offers insights into and new directions for planning theory more generally while at the same time testing this powerful and innovative research hypothesis in an important European city empirical study In detailing the results of this project this book proposes useful ground breaking approaches to planning for similar urban regions **Planning Cultures in Europe** Frank
