Antigravity Marius Alexander Forselius, 2017-12-15. Alpha version work in progress. See notice at the end of the text. Marius Alexander Forselius was born in Romania 1991, only a few years after the Romanian communist regime was overthrown in December 1989. He was adopted to Sweden in 1994 and got diagnosed with autism at five years of age. In this book, he explains the in and out of his life with his disorder and describes how his life has been until now with success and failures and strategies to succeed. One thing he explains is how he through meditation and physical exercise could defy the gravity and get in contact with his feminine spirit when he swims or meditates and how the different twists in his life have given him new insights and strength. For example, he explains about his water visualization meditation which helped him to find his inner soul after a fungal infection forced him to stop swimming and how his virtual bathing as he explains helped him to recover mentally from the fungal crisis and at the same time feel more confident in himself. With the computer as analogy, he explains how his brain works like a computer system which iterates the whole tree structure without filter to the context and then being overloaded and freezes. And he also explains about his creative career in music and software engineering studies and how his music interest was the key to resolve the fungal crisis.
