Exercise training and testing in patients with heart failure Charlotta Lans, 2020-12-15 Patients with heart failure HF suffer from symptoms such as dyspnea fatigue and reduced quality of life which affect their physical function and often lead to immobilization and poor survival prognosis Exercise training in cardiac rehabilitation should be offered to every patient with HF and can be performed both in a hospital setting and with a home training programme Exercise in patients with HF improves physical function and functional capacity as well as health related quality of life HRQoL and reduces the need for hospital care There are several barriers against participating in exercise based cardiac rehabilitation despite information about its benefits The patient may anticipate not being able to exercise that the exercise would be too hard lives far away or has not been referred Aim The aim of this thesis was to evaluate the effects of exercise in heart failure patients of a one year training programme with hospital based training followed by a home based setting or only home based with special emphasis on peripheral muscle training PMT Furthermore to study frequently used methods for evaluation of the effects i.e. the 6 minute walk test and instruments for estimating health related quality of life Methods and findings In study I PMT was evaluated and the PMT

programme in a hospital setting with equipment and subsequent homebased training with elastic bands was compared with solely home based training over 1 year At follow up every third month duplicated six minute walk test 6MWT and two HRQoL questionnaires were used The walking distance increased significantly after three months in both groups and was maintained thereafter Also HRQoL increased but at different time points In study II PMT was compared with interval training on an ergometer bike free walking Both groups started under supervision of a physiotherapist in a hospital setting for three months and thereafter at home for nine months The same measurements were used as in study I Neither walking distance nor HRQoL changed over the study period However this may be regarded as a positive effect in the light of the known progressive nature of heart failure In study III the 6MWTs from study I and II were used to evaluate the necessity of performing duplicated 6MWTs in follow ups clinically and for research purposes We found that it is sufficient to perform one 6MWT In study IV both 6MWT and HRQoL forms from study I and II were used to investigate the relationship between walking distance and perceived HRQoL in HF patients Patients with shorter walking distance than the group median experienced poorer general HRQoL but not HRQoL related to HF than the higher performing half of the study group There were no longitudinal trends in these relationships Conclusion PMT can be used as an exercise modality in patients with HF both in hospital and at home and may be evaluated with a single 6MWT Shorter walking distance was related to a lower general HRQoL as judged by the patients but there was no significant relation between short walking distance and the HF related HRQoL Individualizing the training programme and methods and offering the choice of exercise modality and the possibility of exercising at home might be a way to increase adherence in cardiac rehabilitation

Patienter med hj rtsvikt besv
ras av andf ddhet och tr tthet vilket p verkar deras fysiska funktion och ofta leder till immobilisering nedsatt livskvalitet och d
lig prognos Tr ning inom hj rt Rehabilitering b r erbjudas alla patienter med hj rtsvikt och kan utf ras s v l p sjukhus som
hemma med hemtr ningsprogram Tr ning vid hj rtsvikt f rb ttrar fysisk funktion och funktionell kapacitet h lsorelaterad
livskvalitet och minskar behovet av v rd p sjukhus Det finns m nga barri rer till att delta i hj rt Rehabilitering trots information
om vinster t ex att patienten tror sig inte klara av att tr na bor l ng t ifr n har inte f tt remiss f r att n mna n gra Syfte Syftet
med avhandlingen var att utv rdera effekterna av ett tr ningsprogram f r patienter med hj rtsvikt under 1 r tr ning p sjukhus f
ljt av hemtr ning eller enbart hemtr ning Ett specifikt syfte var att utv rdera perifer muskeltr ning PMT som en m jlig l mpling
tr ningsmetod f r hj rtsviktpatienter Vidare var syftet att utv rdera effekten av sex minuters g ngtest och h lsorelaterad
livskvalitet Metod och resultat I studie I utv rderades PMT och j mf rde tr ning p sjukhus med redskap med efterf ljande
hemtr ning med elastiska band med enbart hemtr ning under 1 r Vid utv rdering var tredje m nad anv ndes dubbla sex
minuters g ngtest och fr geformul r om livskvalitet G ngstr ckan kade signifikant efter tr ning och h ll i sig hela tr
ningsperioden i b da grupperna ven livskvaliteten kade men vid olika tidpunkter I studie II j mf rdes PMT med intervalltr ning
p ergometercykel promenader B da grupperna tr nade under ledning av fysioterapeut i tre m nader och d refter hemma upp

till 1 r Samma utvärdering som i studie I G ngstr cka och livskvaliteten ndrade sig inte under studietiden Det kan dock ses som en positiv effekt eftersom hj rtsviktpatienter vanligen f rs mras ver tid I studie III anv ndes g ngtesten fr n studie I och II f r att utvärdera om det r n dv ndighet att utf ra dubbla sex minuters g ngtest vid utvärdering Ingen kliniskt betydelsefull skillnad s gs mellan g ngtest ett och tv I studie IV anv ndes b de g ngtest och livskvalitetsformul r fr n studie I och II f r att unders ka samband mellan g ngstr cka och upplevd livskvalitet och om detta samband ndrades med tiden Patienter med kortare g ngstr cka upplevde s mre allm n h lsorelaterad livskvalitet men inte livskvalitet relaterad till hj rtsvikten n gon kliniskt signifikant f r ndring ver tid kunde inte p visas Konklusion Perifer muskeltr ning kan anv ndas som en s ker tr ningsform f r patienter med hj rtsvikt b de p sjukhus och som hemtr ning och kan utvärderas med endast ett sex minuters g ngtest Patienter med kortare g ngstr cka upplever s mre allm n livskvalitet vilket f refaller relativt oberoende av de olika testtidpunkterna

Clinical Exercise Physiology Jonathan K Ehrman,Paul Gordon,Paul Visich,Steven J.

Keteyian,2022-04-19 Clinical Exercise Physiology Fifth Edition With HKPropel Access is a comprehensive guide to the clinical aspects of exercise physiology investigating 24 chronic diseases and conditions and addressing a variety of populations The text has been a mainstay in the field since its inception in 2003 and is an ideal resource for students preparing for clinical exercise certifications including those offered by the American College of Sports Medicine ACSM CEP American Council on Exercise Medical Exercise Specialist Canadian Society for Exercise Physiology CSEP CEP and Exercise Sports Science Australia ESSA AEP Clinical Exercise Physiology Fifth Edition employs a logical progression of content to provide greater coverage and depth of diseases than is typically found in most clinical exercise physiology textbooks It examines the effects of exercise on 24 chronic conditions with each chapter covering the epidemiology pathophysiology clinical considerations drug and surgical therapies and exercise testing and prescription issues for the chronic condition Other chapters are devoted to examining exercise related issues for four special populations Each chapter in this fifth edition is revised and updated to include the latest research clinical guidelines and position statements from professional organizations In addition it incorporates the following new elements An upgrade to a full color layout for a more engaging learning experience and enhanced presentation of data New Clinical Exercise Bottom Line sidebars that highlight key information a clinical exercise physiologist needs when working with clinical populations A new chapter on clinical exercise programming that offers detailed recommendations for clinical populations A completely rewritten chapter on spinal cord injury and updates throughout each chapter to reflect the most up to date guidelines and position statements Expanded coverage of clinical exercise physiology certification options In addition to practical application sidebars throughout the text the fifth edition also has related online tools to support student learning Delivered through HKPropel more than 60 case studies are presented in a SOAP note format so students can explore clinical evaluations looking closely at subjective and objective data assessments and plans Discussion questions and interactive key term flash cards foster better understanding and retention while chapter

quizzes can be assigned by instructors through the platform to assess student comprehension Clinical Exercise Physiology Fifth Edition offers a contemporary review of the variety of diseases and conditions that students and professionals may encounter in the field New and veteran clinical exercise physiologists alike as well as those preparing for clinical exercise certification exams will appreciate the in depth coverage of the clinical populations that benefit from physical activity and exercise Note A code for accessing HKPropel is not included with this ebook but may be purchased separately
