College Rankings World Series 2025:

Impacts and Outcomes of Global University Rankings Kayyali, Mustafa, 2025-10-15 Global university rankings shape higher education policies institutional strategies and student experiences worldwide These rankings measure and compare universities based on indicators like research output academic reputation and faculty qualifications While rankings can enhance transparency and promote healthy competition they also generate consequences High rankings can attract funding top faculty and international students Meanwhile the pressure may lead institutions to prioritize metrics potentially decreasing teaching quality social impact and equity As their influence grows it becomes important to examine the real impacts and outcomes of global university rankings on higher education systems *Impacts and Outcomes of Global University Rankings* explores how global university rankings influence institutional behavior resource allocation and policy decisions within higher education It examines the outcomes of these rankings including their effects on academic priorities equity and the student experience across different regions and institutions This book covers topics such as academic reputation internationalization and education quality and is a useful resource for educators policymakers government officials academicians researchers and scientists [UNESCO science report](#) UNESCO, 2015-11-09 There are fewer grounds today than in the past to deplore a North South divide in research and innovation This is one of the key findings of the UNESCO Science Report towards 2030 A large number of countries are now incorporating science technology and innovation in their national development agenda in order to make their economies less reliant on raw materials and more rooted in knowledge Most research and development R D is taking place in high income countries but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report For many lower income countries sustainable development has become an integral part of their national development plans for the next 10 20 years Among higher income countries a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards green technologies The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries Written by more than 50 experts who are each covering the country or region from which they hail the UNESCO Science Report towards 2030 provides more country level information than ever before The trends and developments in science technology and innovation policy and governance between 2009 and mid 2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come *Robin Hood Math* Noah Giansiracusa, 2025-08-05 How the rich and powerful use math to exploit you and what you can do to beat them at their own game Everything we do today is recorded as data that's sold to the highest bidder Plugging our personal data into impersonal algorithms has made government agencies more efficient and tech companies

more profitable But all this comes at a price It s easy to feel like an insignificant number in a world of number crunchers who care more about their bottom line than your humanity It s time to flip the equation turning math into an empowering tool for the rest of us Award winning mathematician Noah Giansiracusa explains how the tech giants and financial institutions use formulas to get ahead and how anyone can use these same formulas in their everyday life You ll learn how to handle risk rationally make better investments take control of your social media and reclaim agency over the decisions you make each day In a society that all too often takes from the poor and gives to the rich math can be a vital democratizing force Robin Hood Math helps you to think for yourself act in your own best interests and thrive
