Remote Work, Internal Marketing and Human Resource Management Teena Mishra, 2024-12-02 Remote working is a developing idea that many organizations are embracing especially in light of COVID 19 and the rise in demand for remote and hybrid roles. As there is no standard model to use for implementation, a number of problems and difficulties develop as popularity increases and hybrid working environments become normalized. This book presents the views, opinions, and reality of remote work and creating an appropriate internal marketing culture in a remote environment. The key topics explored are the significance of remote work, remote work practice, reshaping the work environment, designing remote work models, remote work challenges, remote work facing business organizations, remote work management innovations and technology, the role of motivation and satisfaction in organizational development, employee empowerment in a remote setting, transparency and commitment for sustainable development, and the future of remote work. This research volume will be of value to researchers, academicians, practitioners, and students in the fields of human resource management, organizational studies, and innovation management.

Social Media Management Amy Van Looy, 2022-05-03 This is the second edition of the undergraduate textbook *Social Media Management* which extends the original edition's scope beyond the business angle. The textbook continues with the perspective of organizations, not individuals, and clarifies the impact of social media on their different departments or disciplines while also exploring how organizations use social media to create business value. To do so, the book pursues a uniquely multi-disciplinary approach by embracing IT, marketing, HR, and many other fields. While the first edition was inspired by the rise of social media tools, the second edition is characterized by a digital economy with increasing digitalization efforts due to newly emerging technologies in Industry 4.0 and the COVID 19 pandemic. Readers will benefit from a comprehensive selection of extended topics including strategies and business models for social media, influencer marketing, viral campaigns, social CRM, employer branding, recruitment, search engine optimization, social mining, sentiment analysis, crowdfunding, and legal and ethical issues. Each chapter starts with one or more teaser questions to arouse the readers' interest, which will be clarified per topic. The second edition also provides ample self-test materials and reflection exercises.

Computer-Mediated Communication Caleb T. Carr, 2025-01-15 Caleb T. Carr introduces students to fundamental concepts, theories, and applications of computer-mediated communication. Building on CMC, SIP, SIDE, and hyperpersonal CMC theories, this engaging text gives students a framework for human communication across all existing and future digital channels. The second edition adds a new chapter on health and wellbeing, increased and updated discussion of AI and immersive VR and AR technologies.
