The Routledge Handbook of European Integrations Thomas Hoerber, Gabriel Weber, Ignazio Cabras, 2022-02-27 The

Routledge Handbook of European Integrations fills a significant gap in the European studies literature by providing crucial and groundbreaking coverage of several key areas that are usually neglected or excluded in European integration collections. Whilst still examining the largest and most influential institutions, bodies and highly funded policy areas as acknowledged dominant topics in European studies, it crucially does so with much greater balance by devoting equal billing to areas such as culture in European integration or new technologies and their impact on the EU. Organised around three main sections: culture, technology and tangibles, the book offers an authoritative encyclopaedia to alternative areas in European integration from media, football, Erasmus and tourism to transport, space, AI and energy. It retains coverage of the dominant topics in European studies such as the Eurozone, the Common Internal Market or European law but in balance with other areas of interest and provides an essential companion to existing scholarship in European studies. The Routledge Handbook of European Integrations is essential reading and an authoritative reference for scholars, students, researchers and practitioners involved in and actively concerned about research in the study of European integration studies. The Open Access version of Chapter 14 in this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license.

Global Technology Management 4.0 Pratim Milton Datta, 2022-05-21 Technology is pervasive in today's globalized world. Moreover, technology and globalization drive competitiveness and strategy and must be managed well. This textbook uses technology management as the central theme to cover multiple business and social facets, including digital transformation, cybersecurity, international operations, marketing, finance, culture, human capital and the political economy. The book is divided into four sections. Part 1 examines the confluence of globalization and technology from the first Industrial Revolution to the current Fourth Industrial Revolution. Part 2 introduces strategic and analytical metrics and models that are crucial to managerial decision-making. Part 3 discusses the basics of cybersecurity and combating cyber threats to protect organization and its stakeholders. Part 4 focuses on sustainable operations, global projects and digital transformation in a technology-centric globalized world. The book will help students learn how to navigate business aspects of globalization and technology in the 4th Industrial Revolution (4IR). For instructors, the learning objectives and discussion questions help guide students in grasping the material.
