the measures which accompany it in the choreographies it owes an even greater debt to the English country dance than has hitherto been acknowledged a popular style that received its fullest expression in Playford's English Dancing Master of 1651 The second part of the book focuses on the dances themselves The steps are described in detail and reconstructions provided for the nine Almains and some of the other measures included in the manuscripts Part Three comprises a complete critical edition of the manuscripts These easily performable versions of the dances will be an invaluable aid to those wishing to learn the dances reconstruct them for stagings of Shakespeare's plays or Jacobean masques and for dance historians A

The Sounds and Sights of Performance in Early Music Maureen Epp, 2017-07-05 The experience of music performance is always far more than the sum of its sounds and evidence for playing and singing techniques is not only inscribed in music notation but can also be found in many other types of primary source materials This volume of essays presents a cross section of new research on performance issues in music of the Middle Ages and Renaissance The subject is approached from a broad perspective drawing on areas such as dance history art history music iconography and performance traditions from beyond Western Europe In doing so the volume continues some of the many lines of inquiry pursued by its dedicatee Timothy J McGee over a lifetime of scholarship devoted to practical questions of playing and singing early music Expanding the bases of inquiry to include various social political historical or aesthetic backgrounds both broadens our knowledge of the issues pertinent to early music performance and informs our understanding of other cultural activities

within which music played an important role The book is divided into two parts Viewing the Evidence in which visually based information is used to address particular questions of music performance and Reconsidering Contexts in which diplomatic commercial and cultural connections to specific repertoires or compositions are considered in detail This book will be of value not only to specialists in early music but to all scholars of the Middle Ages and Renaissance whose interests intersect with the visual aural and social aspects of music performance
