Evolutionstheorie im Wandel Axel Lange, 2024-08-13 Die klassische Evolutionstheorie ist unvollständig. Zwar ist die heutige Theorie, die auf Darwin zurückgeht, anhaltend erfolgreich. Doch auf viele Fragen bietet sie keine Erklärung. Welche Vererbungsformen existieren neben der genetischen? Wie entstehen komplexe Variationen im Embryo und vor allem evolutionäre Innovationen, z.B. Vogelfeder oder Schildkrötenpanzer? Wie wirkt die Umwelt auf die Entwicklung der Arten und wie verändern Arten zugleich ihre eigene Umwelt? Warum ist die Evolution von Vögeln, Korallen oder menschlicher Kultur mit der natürlichen Selektion allein nicht erklärbar? Immer stärker treten Forderungen auf, die Synthetische Theorie umfassend zu erweitern. Die wissenschaftlichen Erkenntnisse der letzten Jahrzehnte machen ein erhebliches Umdenken erforderlich. Unsere KI-basierte, nicht biologische Technosphäre ist in die Evolutionstheorie zu integrieren. Das verständlich geschriebene und exzellent recherchierte Buch liefert die spannenden neuen Erkenntnisse hierzu und ist gespickt mit faszinierenden neuen Beispielen aus der Evolutionsbiologie. Alle Kapitel wurden für diese Ausgabe auf den neuesten Stand gebracht. Noch deutlicher als die erste Auflage vermitteln die aktualisierten Inhalte in diesem Band das starke Umdenken in der Evolutionstheorie.

Humanistic Wellbeing Joar Vittersø, 2025-02-12 This open access book seeks to change the way we think about happiness and the good life. It starts ambitiously by exploring how the biological question: What is life? can be integrated with the philosophical question: What is good? It ends with a radical idea for how scientific reasoning can include a value-based theory of the good life. Anchored in basic knowledge about human nature, the new humanistic theory of wellbeing suggests that a life is good to the extent that it allows us to perform our humanness well. The theory further defines a well-performed humanness as the fulfilment of three universal human needs: the need for stability, the need for change, and the need to be cared for. To reach this standpoint, the author critically examines major concepts in the wellbeing literature, such as values, happiness, life satisfaction, affect, hedonia, eudaimonia, and the good life. Based on these reviews, the author argues that a science of wellbeing cannot be strictly descriptive and value-free. A life should not be considered good only because it feels good or is thought of as good for the person living it. A good life must also be committed to a universal morality. Therefore, the humanistic theory of wellbeing suggests that it is good to like one's life, but even better to like it for the right reasons.

The Nature of Life Mark A. Bedau, Carol E. Cleland, 2018-11-22 Introduces a broad range of scientific and philosophical issues about life through the original historical and contemporary sources.
