Darwin's Laboratory Roy M. MacLeod, Philip F. Rehbock, 1994-01-01 No scientific traveler was more influenced by the Pacific than Charles Darwin and his legacy in the region remains unparalleled Yet the extent of the Pacific's impact on the thought of Darwin and those who followed him has not been sufficiently grasped In this volume of essays sixteen scholars explore the many dimensions biological geological anthropological social and political of Darwinism in the Pacific Fired by Darwinian ideas nineteenth century naturalists within and around the Pacific rim worked to further Darwin's programs in their own research in Seattle conchologist P Brooks Randolph in Honolulu evolutionist John Thomas Gulick in Adelaide botanist Richard Schomburgk and in Malaysia biogeographer Alfred Russel Wallace Lesser known enthusiasts furnished Darwin with fresh material and replied to his endless inquiries while young aspiring biologists from Cambridge tested Darwinian ideas directly in the laboratory of the Pacific But the implications of Darwinism for the understanding of human nature and history turned it into a public theory as well as a scientific one Anthropologists geographers missionaries politicians and social commentators from Australia to Japan all found ways to adapt Darwinism to their own agendas Darwin's Laboratory demonstrates the variety and richness of Darwinian ideas in the Pacific and in so doing shows how the region functioned as a testing ground for the theory of evolution Further it illustrates how Darwinian ideas and their European contexts helped invent and define the particular conception we have of the Pacific Both the general reader and the specialist will find controversy illumination and entertainment in this the first book to probe the extent of Darwinism and Darwinian thinking in the Pacific
