Sat Practice Viral Cozy Mystery Best:

Overkill Eugenia Lovett West, 2010-02-22 Emma Streat is rebuilding her shattered life in Boston when she receives an SOS from Venice. She must come at once to intervene in a disastrous affair between her opera singer niece Vanessa and a notorious playboy. But the night Emma and Vanessa return home, Vanessa is struck down by what appears to be the first case of avian flu in the United States. Suddenly Emma is forced to cope with the medical world. As the case assumes a larger international aspect, she finds herself working again with a charismatic British peer. Will their unusual relationship survive? Emma's new interest in a brilliant doctor. After two shocking murders, Emma has to rev up her now established talent for making unlikely connections in order to smoke out a lethal global network that sells stolen viruses and save herself from a painful and horrifying death.

Ebola Millicent Eidsen, 2025-07-19 Deadly Exotic Frightening Ebola. A Microbial Mystery weaves together an intricate tapestry of global public health crises, wildlife conservation, and a deeply personal journey of grief and redemption. Set against the backdrop of disease outbreaks across West Africa and beyond, the story follows veterinarians, physicians, and conservationists who must navigate treacherous field expeditions, steep cultural divides, and ethical dilemmas. As each character strives to uncover the origin of the deadly virus while reconciling past losses and strained relationships, they confront the limits of modern science and the unpredictable power of nature. At its core, the novel explores the intersection between human vulnerability and the environment's relentless power. It examines how global public health crises force us to confront our own mortality, ethical responsibilities, and the limits of scientific control. Characters are set against the grandeur and brutality of the natural world, including lush dangerous jungles and teaming cityscapes, highlighting a constant tension between progress and ethical compromise. The novel overall fits best as a medical thriller with strong elements of adventure fiction and contemporary literary drama. It combines high stakes global public health investigations with intense personal, cultural, and wildlife conflicts. This blend anchors its pulse-pounding suspense alongside in-depth character exploration, setting it apart as both an edge-of-your-seat thriller and a thoughtful meditation on human and natural vulnerability.

Point of View Characters: Maya Maguire, a young American veterinary epidemiologist adopted as an infant from China, craves clarity and understanding about why global health crises, especially Ebola, occur. As a trainee with the Centers for Disease Control and Prevention, she's driven not only by the need to protect human lives but also by a deeper desire to uncover connections between human activity, a changing climate, and disease outbreaks. Maya's research and fieldwork is her primary passion, but she's torn by her need for love and companionship. Stefan Duda, a Polish physician working for the World Health Organization (WHO), prioritizing his public health mission creates conflict with his partner Kondrat, who bears the lion's share of responsibility for raising their adopted daughter in Norway. Stefan repeatedly drags Maya into dangerous disease investigations. Faye Simpson, recently retired as

New York City's public health veterinarian finds herself at loose ends for a meaningful mission. In addition to mentoring Maya, she focuses on her personal relationship with the much younger Taylor Lewis. Then the Ebola virus pulls her back into disease detective mode and Taylor invites her to assist with Ebola vaccination in Ghana. Taylor Lewis, of Ghanaian ancestry, is the Chief of Staff for a hospital on Staten Island. As a trans female, Taylor uses code switching to negotiate medical and leadership responsibilities. Taylor's uncle in Ghana begs for help in battling an Ebola outbreak, posing professional challenges and personal threats. Biko Okeke is a new community health physician. He leads WHO colleagues to a gorilla sanctuary near his home in Nigeria before the explosion of a multinational Ebola outbreak. At the end of the novel, he relinquishes guiding responsibility to his younger sister Nneka as he questions his future role with WHO. Mark Zielinski is a powerful attorney and philanthropist in the American Southwest. He bonds with Maya during their shared recovery in New Mexico from serious health and family challenges, then tips their relationship from close friends to lovers. Join these intriguing and diverse characters as their lives are stitched together by the shepherd's crook of the Ebola virus, which kills primates like gorillas and more than half of infected people.
