have been developed to address this question The main theme of this book Knowledge Representation and Inductive Reasoning using Conditional Logic and Sets of Ranking Functions is inductive reasoning from conditional knowledge bases Using ordinal conditional functions as ranking models for conditional knowledge bases the author studies inferences induced by individual ranking models as well as by sets of ranking models He elaborates in detail the interrelationships among the resulting inference relations and shows their formal properties with respect to established inference axioms Based on the introduction of a novel classification scheme for conditionals he also addresses the question of how to realize and implement the entailment relations obtained In this work Steven Kutsch convincingly presents his ideas provides illustrating examples for them rigorously defines the introduced concepts formally proves all technical results and fully implements every newly introduced inference method in an advanced Java library He significantly advances the state of the art in this field Prof Dr Christoph Beierle of the FernUniversität in Hagen
