Federal Register ,2013-02 **Sunk Cost** Jillian Berman,2025-04-08 Exposes the forgotten origins of the student loan system how politicians have attempted to fix it and the life altering damage borrowers face Student loan horror stories are a dime a dozen But students today are faced with a seemingly insurmountable paradox Research consistently shows that the clearest viable option to financial stability is a college degree But if and when Americans decide to pursue diplomas student loan payments quickly follow and even after securing full time employment many borrowers struggle to make ends meet for years In Sunk Cost journalist Jillian Berman explores how the nation s student loan program went from a well intentioned initiative aimed at helping low and middle income students afford college to one that traps borrowers in long term debt Berman interviewed dozens of borrowers and policymakers and dug into the archives to unearth the true causes of the student loan problem A couple of generations ago policy makers generously subsidized Americans college educations because they knew it would be advantageous for the entire country a more educated population meant better quality of life for all But today higher education is viewed as an individual goal so students and their families are expected to be on the hook for it themselves Berman explains how this enormous shift happened which industries benefit from it and what it means for college going Americans today She shares real life stories of college graduates who are being crushed under some of the harshest consequences of the student loan system These borrowers pursued higher education in hopes of a better life and yet some have been trapped in debt for decades making it difficult to put food on the table much less imagine a life beyond debt By connecting personal accounts to the policy history of student loans Berman makes clear that if American society continues to push students toward higher education but fails to truly subsidize it the financial strain will become unbearable for all but the most privileged The current system is broken but Berman proposes that significant changes are possible and will require political will from state lawmakers and Congress along with a philosophical shift to tackle one of the largest consumer finance challenges of our time **Reauthorization on the Higher Education Act of 1965** United States.
