What Readers Do Beth Driscoll, 2024-02-21 Shining a spotlight on everyday readers of the 21st century, Beth Driscoll explores how contemporary readers of Anglophone fiction interact with the book industry, digital environments, and each other. We live in an era when book clubs, bibliomemoirs, Bookstagram, and BookTok are as valuable to some readers as solitary reading moments. The product of nearly two decades of qualitative research into readers and reading culture, *What Readers Do* examines reading through three dimensions: aesthetic conduct, moral conduct, and self-care, to show how readers intertwine private and social behaviors and both reinforce and oppose the structures of capitalism. Analyzing reading as a post-digital practice that is a synthesis of both print and digital modes and on and offline behaviors, Driscoll presents a methodology for studying readers that connects book history, literary studies, sociology, and actor-network theory. Arguing for the vitality, agency, and creativity of readers, this book sheds light on how we read now and on how much more readers do than just read.

Implicit Bias and Mental Health Professionals: C. Curtis Holmes Ph.D., Courtney Lamb LMSW, 2023-06-05 As mental health professionals working at a child advocacy center (CAC), both authors have experienced and researched issues that impact each professional field, which makes up the multidisciplinary team (MDT). These fields primarily include mental health professionals of children, school counselors, and school social workers, forensic interviewers, child and family advocates, sexual assault nurse examiners, CAC administrators, Child Protective Service investigators, law enforcement investigators, prosecutors, and other attorneys and judges. Even mental health professionals of children who never intended to specialize in the CAC world will inevitably be working with numerous clients with a trauma and abuse history. Therefore, it is best if all mental health professionals of children become more aware of the CAC world, the workings of MDTs, and of a greater understanding of systems and of implicit bias that influence thinking, recommendations, and professional behavior with cases of child abuse.
