AI has evolved from being merely a development standpoint in computer science. Indeed, recent reports and academic publications show that we are clearly on the path toward pervasive AI in both business and society. Organizations must adopt AI to maintain a competitive advantage and explore opportunities for unprecedented innovation. This book focuses on understanding the wide range of opportunities as well as the spectrum of challenges AI brings in different business contexts and society at large. The book highlights novel and high quality research in data science and business analytics and examines the current and future impact of AI in business and society. The authors bridge the gap between business and technical perspectives and demonstrate the potential and actual impact on society. Embracing applied qualitative and quantitative research as well as field experiments and data analysis, the book covers a broad range of topics including but not limited to human centered AI, product and process innovation, corporate governance, AI and ethics, organizational performance and entrepreneurship. This comprehensive book will be a valuable resource for researchers, academics and postgraduate students across AI technology and innovation management and a wide range of business disciplines.

The Digital Journey of Banking and Insurance, Volume I Volker Liermann, Claus Stegmann, 2021-10-30. This book, one of three volumes, showcases the effective transformation of companies providing banking and insurance services. This first volume gives a business oriented introduction to the setting and the current challenges of fintech, regtech and insurtech and provides an outlook on what will be needed in the future. Specific sub departments in financial services are examined with a view to accounting risk and regulatory segments. The book also addresses the importance of cultural aspects of the coming digital transformation with an eye to requirements that will enable a digital bank or insurance company to thrive in 2025. The angle shifts over the volumes from a business driven approach in Disruption and DNA to a strong technical focus in Data Storage, Processing and Analysis, leaving Digitalization and Machine Learning Applications with the business and technical aspects in between.
