Rankings - Soziologische Fallstudien Leopold Ringel, Tobias Werron, 2019-09-03 Rankings sind in der modernen Gesellschaft allgegenwärtig: Athleten, Hotels, Nationalstaaten, Unternehmen, Universitäten, Kunsttreibende und viele andere sehen sich Leistungsvergleichen in der Form von regelmäßig veröffentlichten Ranglisten ausgesetzt. Die Beiträge des Sammelbandes nähern sich dem Phänomen aus einer genuin soziologischen Perspektive und untersuchen u.a. die Produktion, Verwendungsweisen, Institutionalisierung und Effekte von Rankings in unterschiedlichen gesellschaftlichen Feldern.

Research Handbook on University Rankings Hazelkorn, Ellen, Mihut, Georgiana, 2021-12-10 Gathering unique and thoughtful contributions from leading international scholars, this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged. It presents an in-depth analysis that reflects the current state of research on rankings, their influence and impact.

Qualitätsentwicklung in der postgradualen Weiterbildung Werner Fröhlich, *University Rankings* Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground-breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases, methodological issues, societal impact and policy implications, providing readers with a deep understanding of these controversial comparators. The authors propose that university rankings are misused by policymakers and institutional leaders alike. They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys' assessment of their status. The result is that institutions suffer from short-termism, realigning their resources to maximize their relative rankings. While rankings are widely used in policy and academic discussions, this is the first book to explore the theoretical and methodological issues of ranking itself. It is a welcome contribution to an often highly charged debate. Far from showing how to manipulate the system, this collection of work by key researchers aims to enlighten interested parties.

Rankings and the Reshaping of Higher Education Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation. This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective, drawing in new original research and extensive analysis. It is essential reading for policymakers, managers and scholars.

Rankings and the Reshaping of Higher Education E. Hazelkorn, 2011-03-08 University rankings have gained popularity around the world and are now a significant factor shaping reputation. This book is the first comprehensive study of rankings from a global perspective, making an important contribution to our understanding of the rankings phenomenon. This book has also been published in Japanese.

University Rankings William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan's higher education system. It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan. The author develops

a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan s higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia

Ranking Business Schools Linda Wedlin,2006-01-01 In her admirable book Wedlin entangles what business school rankings really are and why

they have become so important The book contains plenty to interest the growing army of business school employees whose duties at least in part are concerned with boosting their institution's position in the rankings Education and Training In times when the management education field is increasingly impacted by a proliferation of ranking exercises this book is a timely and welcome contribution Linda Wedlin unpacks for us the real meaning of the contemporary explosion of rankings Rather than simple classification schemes and mechanisms rankings are she suggests arenas where the field of business education is being created and re created They are the loci of boundary work whereby a field is progressively evolving and constituting itself This is a convincing study relying on rich empirical data and carefully anchored in relevant theoretical debates A must read for all those academics students policy makers and education professionals who want to understand the complex contemporary logics of higher education in management but also probably well beyond Marie Laure Djelic ESSEC Business School Paris France League tables appear everywhere and have become important aspects of business school environments Based on in depth and creatively combined empirical studies Linda Wedlin provides us with explanations and insights on the emergence and impact of such rankings This book should be of great value for all those who seek to play the ranking game It gives a fresh perspective on how classification mechanisms drive the emergence boundary setting and change of organizational fields Kerstin Sahlin Andersson Uppsala University Sweden A fascinating study of the complex issues surrounding MBA rankings Business schools really hate them but at times have to pretend to love them Magazines and newspapers are really interested in their sales potential but have to make pretensions about their veracity Linda Wedlin focuses on an area rich in hypocrisy and hype but also one where there are real consequences ranking furthered re inforces the homogenising tendencies of MBAs Anthony Hopwood Sa d Business School University of Oxford UK This is a most fascinating topic dealt with in a manner which is both serious and entertaining everyone in a business school would want to read it Linda Wedlin's excellent research is presented with a no nonsense approach if there is anything worth counting she counts it and then interprets it no fuss Exemplary Barbara Czarniawska G teborg University Sweden This engaging book offers a fresh perspective on the burgeoning field of European management education and its intense concern with rankings Using a creative mix of well crafted research tools Wedlin deftly captures a professional field in transition as it both expands and develops shared standards Walter W Powell Stanford University US International comparisons and rankings of universities and business schools have proliferated in recent years Ranking Business Schools provides a welcome analysis of this development and its implications for the field of management education theorizing the role of classifications such as rankings in forming and structuring organizational fields Focusing on the European experience with rankings and the subsequent response the book illustrates how business schools use rankings to form identities and positions and to draw boundaries for the field By both creating and confirming belonging to a business school community and providing distinction within that group rankings are important for defining an international field of management education organizations

constructing an international business school market and constitute an arena for debating and establishing the boundaries of this field Building an extensive theoretical framework for understanding classification

Mfume,2018-12-21 Despite the Great Recession and looming student loan debt crisis college education remains the most proven invaluable lifetime investment and serves as the most reliable path to upward mobility and socioeconomic class reassignment Mfume suggests that the value added of even one year of college can be transformative As higher education professionals and partners continue to advocate for new and improved college retention and graduation measures The College Completion Glass Half Full or Half Empty Exploring the Value of Postsecondary Education presents a new paradigm for higher education one that focuses on the value added of postsecondary education as well as on student success beyond the traditional measure of college graduation rates a model which merges conventional practices and supports for students with non traditional partnerships with and advocacy from successful non completers **Higher Education in South**

Dakota United States. Office of Education. Division of Higher Education,1960 The Creative Discipline Nancy K. Napier,Mikael Nilsson,2008-06-30 Why are some organizations more creative than others What sets innovative high performing organizations apart Can creativity and innovation be learned and enhanced The answer to the last question say creativity experts Nancy Napier and Mikael Nilsson is a resounding yes And with general consensus that creativity and innovation drive business growth fostering creativity couldn t be more important In The Creative Discipline Napier and Nilsson illustrate six key factors that power creative high achieving organizations and they provide managers with guidelines for incorporating those factors into their own companies Business people will learn how innovative organizations get superior results from employees not just through disciplined methods of thinking but also through free flowing work spaces and work practices that help supercharge the imagination Combining research on creative organizations in several sectors this book argues that innovative organizations known for doing things differently and profitably approach creativity and innovation in similar disciplined ways regardless of industry or field That discipline fosters new ideas solutions and approaches and it ensures that the flow of creativity is constant The Creative Discipline demonstrates that Innovative high performing organizations have three disciplines in common 1 within discipline mastery 2 out of discipline thinking and 3 a disciplined process that leads to innovation Innovative organizations also have three factors that strengthen the creative disciplines faces creative entrepreneurs leaders and teams places the physical and organizational infrastructure that is reflected in offices buildings and location and traces elements that act as catalysts for creativity the culture networks and policies that support creative and innovative endeavors The book explains each factor for creative success in detail Best Napier and Nilsson show creativity and innovation at work in a range of sectors from sports to software to theater and contemporary circus They also show how innovative practices in developed countries like the U S and Sweden compare to those in developing countries like Vietnam Companies can learn to innovate and in the process reap benefits like higher sales and profits greater productivity while regaining a valuable element missing in so many workplaces fun *Prediction Markets* Leighton Vaughan Williams,2011-06-16 How does one effectively aggregate disparate pieces of information that are spread

among many different individuals In other words how does one best access the wisdom of the crowd Prediction markets which are essentially speculative markets created for the purpose of aggregating information and making predictions offer the answer to this question The effective use of these markets has the potential not only to help forecast future events on a national and international level but also to assist companies for example in providing improved estimates of the potential market size for a new product idea or the launch date of new products and services The markets have already been used to forecast uncertain outcomes ranging from influenza to the spread of infectious diseases to the demand for hospital services to the box office success of movies climate change vote shares and election outcomes to the probability of meeting project deadlines The insights gained also have many potentially valuable applications for public policy more generally These markets offer substantial promise as a tool of information aggregation as well as forecasting whether alone or as a supplement to other mechanisms like opinion surveys group deliberations panels of experts and focus groups Moreover they can be applied at a macroeconomic and microeconomic level to yield information that is valuable for government and commercial policy makers and which can be used for a number of social purposes This volume of original readings contributed by many of the leading experts in the field marks a significant addition to the base of knowledge about this fascinating subject area The book should be of interest to anyone looking at monetary economics economic forecasting and microeconomics
