O'Grady, 2008-12-30 Two guys named Steve working in a garage created a prototype computer designed to be different in a way no one thought possible It would be easy to use Those two Steves one now a billionaire and still at the head of Apple not only succeeded with that product but they also broke ground in the business world in ways few thought possible They proved you could not only have fun at work but pursuing a capitalist dream could be hip How did Apple do it How did it go from making computers that made a difference but not much of a dent in the overall market to creating a device the iPod and a music service iTunes that has changed the way we buy and experience music And how did the Macintosh and its successors capture the hearts and minds of computer users so deeply that being a Mac person makes you a member of a special club That s what this book is all about As author Jason D O Grady shows Apple is a rare company one that is not afraid to think about a future that does not
