Guide to Web Application and Platform Architectures Stefan Jablonski, Ilia Petrov, Christian Meiler, Udo

Mayer, 2013-03-09 New concepts and technologies are being introduced continuously for application development in the World Wide Web. Selecting the right implementation strategies and tools when building a Web application has become a tedious task requiring in-depth knowledge and significant experience from both software developers and software managers. The mission of this book is to guide the reader through the opaque jungle of Web technologies. Based on their long industrial and academic experience, Stefan Jablonski and his coauthors provide a framework architecture for Web applications which helps choose the best strategy for a given project. The authors classify common technologies and standards like NET, CORBA, J2EE, DCOM, WSDL and many more with respect to platform architectural layer and application package and guide the reader through a three-phase development process consisting of preparation, design, and technology selection steps. The whole approach is exemplified using a real-world case: the architectural design of an order entry management system. Oracle

Ulka Rodgers, 1991 This volume covers all aspects of using the Oracle products from initial information systems planning tasks through to developing an application and implementing it in production. The book utilizes instances of Oracle's own CASE Computer Aided Software Engineering tools. Kundenorientierte Workflowprojekte, 2013-03-09 Die Einführung von Workflowsystemen verspricht viele Vorteile; sie gilt aber zugleich als ein aufwendiges und risikoreiches Unterfangen. Dieses Buch entwickelt einen eigenen Methodenvorschlag für die Prozessumsetzung mit Hilfe von Workflowsystemen. **Oracle8**
