Organization and Organizing Daniel Robichaud, Francois Cooren, 2013-05-02 Recipient of the 2013 Top Edited Book Award by the Organizational Communication Division of the National Communication Association USA This timely collection addresses central issues in organizational communication theory on the nature of organizing and organization The unique strength of this volume is its contribution to the conception of materiality agency and discourse in current theorizing and research on the constitution of organizations It addresses such questions as To what extent should the materiality of texts and artifacts be accounted for in a process view of organization What part does materiality play in the process by which organizations achieve continuity in time and space In what sense do artifacts perform a role in human communication and interaction and in the constitution of organization What are the voices and entities participating in the emergence and stabilization of organizational reality The work represents scholarship going on in various parts of the world and features contributions that overcome traditional conceptions of the nature of organizing by addressing in specific ways the difficult issues of the performative character of agency materiality as the basis of the iterability of communication and continuity of organizations and discourse as both textuality and interaction The contributions laid out in this book also pay tribute to the work of the organizational communication theorist James R Taylor who developed a view of organization as deeply rooted in communication and language Contributors extend and challenge Taylor's communicative view by tackling issues and assumptions left implicit in his work **The SAGE Handbook of Organizational Communication** Linda L.

E. Mills, Francois Cooren, 2019-10-23 The field of organisational communication has been rapidly transforming in the wake of the linguistic and discursive turns that have been sweeping across the social sciences since the mid eighties These turns have prompted organisational communication scholars to look more closely at how they think about communication and its relationship to the organisation and the process of organizing What has emerged from these reflections is a perspective that proposes communication is not merely something that happens in organisations but is the heart of organizing and therefore actually constitutes the organisation This perspective which embraces several sub threads is now commonly referred to as the CCO Communication as Constitutive of Organisation perspective This is itself evolving as scholars come to realize that organizing does not just occur at the discursive level It is inextricably coupled to the material and relational aspects of work the discourse mutually constitutes relationships between human and non human bodies that combine to create what we encounter when we participate in organisational life This book examines the way these three dimensions combine to create organisational outcomes In doing so it advances CCO and sociomateriality scholarship and contributes to new ways of thinking about strategy and practice The series of empirical studies should interest the widely interdisciplinary audience that seeks to understand work organizing and management This book was originally published as a special issue of the Communication Research and Practice journal

Taylor, Elizabeth J. Van Every, 2010-09-13 The Situated Organization explores recent research in organizational communication emphasizing the organization as constructed in and emerging out of communication practices Working from the tradition of the Montreal School in its approach it focuses not only on how an organization's members understand the purposes of the organization through communication but also on how they realize and recognize the organization itself as they work within it The text breaks through with an alternative viewpoint to the currently popular idea of organization as network viewing organization instead as a configuration of agencies and their fields of practice It serves as an original comprehensive and well written text elaborated by case studies that make the theory come to life The substantial ideas and insights are presented in a deep and meaningful way while remaining comprehensible for student readers This text has been developed for students at all levels of study in organizational communication who need a systematic introduction to conducting empirical field research It will serve as an invaluable sourcebook in planning and conducting research *Organizing for Independence* Hans Jonas Gunzelmann, 2025-10-01 Independence protests are on the rise across Europe as Spain the UK and other states have faced severe secessionist challenges The largest wave of these protests swept Catalonia and reached its peak in 2017 when the push for a binding referendum led to an unprecedented secessionist crisis Organizing for Independence explores the question of how the referendum crisis as a threat and

opportunity transformed secessionist protest and its organizational basis Combining protest event data qualitative interviews and network analyses Hans Jonas Gunzelmann shows how organizational change took place inside outside and between formal organizations and was driven by activists symbolic constructions of transformative events The book goes beyond simplistic accounts of secessionist protest by providing a dynamic perspective on strategic interactions between protesters and their opponents and allies These insights are particularly timely as independence movements all over the world look with great interest at what happened in Catalonia

Verbal Communication Andrea Rocci, Louis de Saussure, 2016-03-07
Common sense tells us that verbal communication should be a central concern both for the study of communication and for the study of language Language is the most pervasive means of communication in human societies especially if we consider the huge gamut of communication phenomena where spoken and written language combines with other modalities such as gestures or pictures Most communication researchers have to deal with issues of language use in their work Classic methods in communication research from content analysis to interviews and questionnaires not to mention the obvious cases of rhetorical analysis and discourse analysis presuppose the understanding of the meaning of spontaneous or elicited verbal productions Despite its pervasiveness verbal communication does not currently define one cohesive and distinct subfield within the communication discipline The Handbook of Verbal Communication seeks to address this gap In doing so it draws not only on the communication discipline but also on the rich interdisciplinary research on language and communication that developed over the last fifty years as linguistics interacted with the social sciences and the cognitive sciences The interaction of linguistic research with the social sciences has produced a plethora of approaches to the study of meanings in social context from conversation analysis to critical discourse analysis while cognitive research on verbal communication carried out in cognitive pragmatics as well as in cognitive linguistics has offered insights into the interaction between language inference and persuasion and into cognitive processes such as framing or metaphorical mapping The Handbook of Verbal Communication volume takes into account these two traditions selecting those issues and themes that are most relevant for communication scholars It addresses background matters such as the evolution of human verbal communication and the relationship between verbal and non verbal means of communication and offers an extensive discussion of the explicit and implicit meanings of verbal messages with a focus on emotive and figurative meanings Conversation and fundamental types of discourse such as argument and narrative are presented in depth as is the key notion of discourse genre The nature of writing systems as well as the interaction of spoken or written language with non verbal modalities are devoted ample attention Different contexts of language use are considered from the mass media and the new media to the organizational contexts Cultural and linguistic diversity is addressed with a focus on phenomena such as multilingual communication and translation A key feature of the volume is the coverage of verbal communication quality Quality is examined both from a cognitive and from a social perspective It covers topics that range from the cognitive processes underlying deceptive

communication to the methods that can be used to assess the quality of texts in an organizational context
