Training, Supervision, and Professional Development in Human Services Organizations Helena Maguire, Rita M. Gardner, Frank L. Bird, James K. Luiselli, 2022-06-14 Professional Development Training and Supervision in Human Services Organizations provides the latest research on Human Service Organizations (HSO) groups both public and private and their use of the Organizational Behavior

Management OBM model for effective designing implementing and maintaining services within HSOs Each volume in this series highlights key concepts and applications pertinent to each division of HSOs with this release providing program directors and supervisors with the tools they need to develop an efficient and effective training program for onboarding performance evaluation and professional development for their staff Provides detailed content and components for delivering orientation and new hire training Demonstrates how to use function based assessments during evaluations Highlights various on the job training techniques for clinical programs including shadow training and knowledge quizzes Details steps for continuous professional development including certification and participation in scholarly activities *Programming Effective Human Services* Walter Christian, 2012-12-06 Human service programming has been the focus of much public scrutiny legislative action and applied research in recent years As a result human service providers have learned to exhibit greater respect for the needs and legal rights of their consumers the appropriateness and cost effectiveness of treatment procedures and service programs and the personnel and facilities involved in providing services to consumers Despite this encouraging trend many human service agencies are still trying unsuccessfully to meet the two fundamental criteria of effective programming 1 providing services that are effective in meeting the needs of the consumer and 2 equipping consumers to function independently of the human service system to the extent possible For example there appears to be a general acceptance of the notion that custodial institutional service programs are needed despite the fact that they are ineffective in rehabilitating and transitioning clients to the community and that they are difficult to change In addition although community based service programs have been developed as alternatives to institutional placement there is rarely sufficient transitional planning and programming to facilitate the client's progress from the institution to the community Although these problems generally are acknowledged most human service managers and practitioners are ill equipped to deal with them Specifically the technology of human service management is in need of improvement It is more theoretical than practical and it lacks sufficient field testing and empirical validation
