

Life on Earth

History of Mesozoic Life

The Age of the Dinosaurs

The Mesozoic Era is best known as the age of the dinosaurs. These large reptiles dominated the land and seas of the Earth during this era. Dinosaurs filled all the niches that are currently filled by mammals today. There were plant eating, meat eating, endothermic, bipedal, and quadrupedal dinosaurs. Dinosaur bones had canals, which indicated that they were active creatures.

Study Tip

The Mesozoic Era can be divided into three separate periods: Triassic, Jurassic, and Cretaceous. Each period had similarities between one another as well as unique characteristics.

Time Line

Terrestrial Life

- Seed plants and trees diversified and spread widely.
- Lush forests covered much of the land, especially at higher altitudes.
- Flowering plants evolved during the Cretaceous.

Archaeamphoralongicervia, a cretaceous plant

Marine Life

- Tiny phytoplankton became the base of the marine food web.

Origin Of Life Study Guide 12:

Science Curriculum Topic Study Page Keeley, 2005-02-23 Without question this book will be of great value to the profession of science teaching. Given today's educational landscape of standards and high stakes testing, curriculum topic study is an essential piece of the puzzle. Cary Sneider, Vice President for Educator Programs, Museum of Science, Boston. Discover the missing link between science standards, teacher practice, and improved student achievement. Becoming an accomplished science teacher not only requires a thorough understanding of science content but also a familiarity with science standards and research on student learning. However, a comprehensive strategy for translating standards and research into instructional practice has been lacking since the advent of standards-based education reform. Science Curriculum Topic Study provides a systematic professional development strategy that links science standards and research to curriculum instruction and assessment. Developed by author Page Keeley of the Maine Mathematics and Science Alliance, the Curriculum Topic Study CTS process can help teachers align curriculum instruction and assessment with specific research-based ideas and skills. The CTS process will help teachers improve their understanding of science content, clarify a hierarchy of content and skills in a learning goal from state or local standards, define formative and summative assessment goals and strategies, learn to recognize and address learning difficulties, increase opportunities for students of all backgrounds to achieve science literacy, design or utilize instructional materials effectively. Containing 147 separate curriculum topic study guides arranged in eleven categories that represent the major domains of science, this book provides the tools to both positively impact student learning and develop the knowledge and skills that distinguish expert science teachers from novices.
