Reading Randomised Controlled Trials Robert Savage, Amy Fox, Anneka Dawson, Helen Gray, Clare Huxley, 2025-03-03 In early 2021/22 the Flexible Phonics reading intervention a large scale randomised controlled trial took place in 118 schools in England and involved nearly 3 000 children This study aimed to provide valuable insights into the success of largely school based education trials The Flexible Phonics trial proved to be not only an important experiment in improving children s literacy but a case study in which the methodology of single randomised controlled trials in education can be considered *Reading Randomised Controlled Trials* investigates the complexities of conducting randomised controlled trials in the field of education and how they can be seen as a cultural activity The book emphasises the human operations decision making and actions that drive such trials which are often overlooked in published reports Through the case study of Flexible Phonics the book highlights the key differences between scaled educational trials and other types of trials such as pharmaceutical trials The additional focus on early childhood literacy is of significant educational importance particularly in the context of UK school partial closures in 2020 and 2021 during the Covid 19 pandemic *Reading Randomised Controlled Trials* is ultimately a unique resource on the implementation of randomised controlled trials in authentic school contexts and for the sustained improvement of practice in education Suzanne I. Barchers, 2012

Robledo, Amber Gove, 2019-02-25 Access to books is key to learning to read and sustaining a love of reading Yet many low and middle income countries struggle to provide their students with reading materials of sufficient quality and quantity Since 2008 RTI International has provided technical assistance in early reading assessment and instruction to ministries of education in dozens of low and middle income countries The central objective of many of these programs has been to improve learning outcomes in particular reading for students in the early grades of primary school Under these programs RTI has partnered with ministry staff to produce and distribute evidence based instructional materials at a regional or national scale in quantities that increase the likelihood that children will have ample opportunities to practice reading skills and at a cost that can be sustained in the long term by the education system In this paper we seek to capture the practices RTI has developed and refined over the last decade particularly in response to the challenges inherent in contexts with high linguistic diversity and low operational capacity for producing and distributing instructional materials These practices constitute our approach to developing and producing instructional materials for early grade literacy We also touch upon effective planning for printing and distribution procurement but we do not consider the printing and distribution processes in depth in this paper We expect this volume will be useful for donors policymakers and practitioners interested in improving access to cost effective high quality teaching and learning materials for the early grades Trilingual Education of Uyghur Children Wei Xiaobao, 2024-04-29 Given the differences in the orthographic structure of the Uyghur Chinese and English languages this study used a mixed method approach to systematically describe and analyze the phonological awareness of Uyghur bilingual children as English learners and its contributions to their trilingual literacy acquisition and development Focusing on the

development of these learners phonological awareness in Uyghur Chinese and English this study explored the influences of Uyghur and Chinese learning on the formation of their English phonological awareness and the roles of different components of phonological awareness in their trilingual literacy development Based on the characteristics of the phonetic structure in Uyghur Chinese and English and the development of Uyghur children s phonological awareness in these languages a Chinese phonetic identification training and Uyghur Chinese English comprehensive phonetic training program including intensive phoneme category contrast training and phonics training was designed to explore whether such targeted phonetic identification training can effectively improve these children s phonological awareness in Chinese and English and thus further promote their trilingual literacy development This book will appeal to researchers and students interested in the fields of psycholinguistics language acquisition and multilingual education
