Apple captures most of the industry profits thanks to its high prices large profit margins and the volume of iPhone sales worldwide Apple's success is explained as a result of its ability to develop its own intellectual property IP and take advantage of IP created by suppliers through a strategy of selling only a few models at high prices compared to competitors The Technology, Business, and Economics of Streaming Video Eli Noam, 2021-01-29 Along with its interrelated companion volume The Content Impact and Regulation of Streaming Video this book covers the next generation of TV streaming online video with details about its present and a broad perspective on the future It reviews the new technical elements that are emerging both in hardware and software their long term trend and the implications It discusses the emerging media cloud of video and infrastructure platforms and the organizational form of such TV

A Survey on Today's Smartphone Usage Tobias Himmelsbach, 2012-05-26 Diploma Thesis from the year 2011 in the subject Computer Science Miscellaneous grade 2 3 Technical University of Berlin Agententechnologien in betrieblichen Anwendungen language English abstract The smartphone market is evolving rapidly irrespective of the well known spread within the business sector In recent years the average users tend to replace their traditional mobile phones PDAs and Palms with smartphones These devices have become a pervasive part of everyday life Dealing with huge amounts of data the mobile devices and applications demand for certain security standards cannot be underestimated In recent studies the individual user's needs in terms of technical features applications etc have not been addressed and analyzed properly To capture the problem in its full extent it is vital to understand the user's expectations Besides the usage patterns have to be described especially against the background of security aspects As mentioned before recent analyzes did not specifically ask what the user expects from a smartphone Hence the main objective of this work is to get a broad picture on how smartphones are used today and what users expect taking into consideration security aspects An international web based online survey was designed and performed to measure and analyze users behaviour when using smartphones with the aim of finding out what they want and expect from a smartphone The main goals were to identify user needs in the context of smartphones to analyze their knowledge and acquisition to security aspects and to get significant data about the user's behaviour The main findings of the survey are that on the one hand most of the users want a smartphone to provide classic mobile phone features such as performing phone calls writing messages or storing contacts On the other hand they want a smartphone to provide mobile internet access navigation features multimedia aspects a comfortable usability and a good look

Redefining Management Practices and Marketing in Modern Age Dr. Dilip B. Patil, Dr. Dinesh D. Bhakkad, 2014

Licensing Standard Essential Patents Igor Nikolic, 2021-11-18 What is the licensing framework of standard essential patents SEPs for connectivity standards such as 5G and Wi-Fi How will the framework change with the Internet of Things IoT This book provides comprehensive answers to these questions For over two decades connectivity standards have been the subject of litigation and controversy around the globe Now with the introduction of 5G and the emergence of the world of connected objects or the IoT the licensing

framework for SEPs is becoming even more contentious In order to bring clarity to the debate this book analyses and explains key components of a fair reasonable and non discriminatory FRAND licence for SEPs clarifies the economic policy and market background of SEP disputes examines the interrelated application of contract patent and competition laws and describes the approaches by courts and regulators in the EU US and the UK Importantly the book also assesses how the experience from the smartphone and ICT industries can be applied in a new environment of the IoT and considers what needs to be changed in the future SEP licensing landscape The book provides a holistic coverage of SEP licensing issues in an attempt to reduce uncertainty within this highly complex and technical area and will be useful to practitioners policy makers SMEs and large technology companies in the IoT as well as academics interested in the field Technology and Oligopoly Capitalism Luis Suarez-Villa,2023-04-14 Technology and Oligopoly Capitalism is a major contribution to our understanding of how technology oligopolies are shaping America s social economic and political reality Technology oligopolies are the most powerful socioeconomic entities in America From cradle to grave the decisions they make affect the most intimate aspects of our lives how we work what we eat our health how we communicate what we know and believe whom we elect and how we relate to one another and to nature Their power over markets trade regulation and most every aspect of our governance is more intrusive and farther reaching than ever They benefit from tax breaks government guarantees and bailouts that we must pay for and have no control over Their accumulation of capital creates immense wealth for a minuscule elite deepening disparities while politics and governance become ever more subservient to their power They determine our skills and transform employment through the tools and services they create as no other organizations can They produce a vast array of goods and services with labor marketing and research that are more intrusively controlled than ever as workplace rights and job security are curtailed or disappear Our consumption of their products and their capacity to promote wants is deep and far reaching while the waste they generate raises concerns about the survival of life on our planet And their links to geopolitics and the martial domain are stronger than ever as they influence how warfare is waged and who will be vanquished Technology and Oligopoly Capitalism s critical multidisciplinary perspective provides a systemic vision of how oligopolistic power shapes these forces and phenomena An inclusive approach spans the spectrum of technology oligopolies and the ways in which they deploy their power Numerous previously unpublished ideas expand the repertory of established work on the topics covered advancing explanatory quality to elucidate how and why technology oligopolies operate as they do the dysfunctions that accompany their power and their effects on society and nature This book has no peers in the literature in its scope the unprecedented amount and diversity of documentation the breadth of concepts and the vast number of examples it provides Its premises deserve to be taken into account by every student researcher policymaker and author interested in the socioeconomic and political dimensions of technology in America *Communication Shock* Ty Adams,Steve Smith,2015-09-04 In the spirit of Alvin Toffler s acclaimed works peering into the future of the technological society

Communication Shock is a concise history of communication technologies and an exploration of the possible social and human impacts of nanotechnology on the ecology of human communication. As we become increasingly more networked with communication technologies, we must come to understand and confront the social impact of these changes. More importantly, we must wisely choose in embracing or rejecting these technologies and exploring how we might do both by striking an appropriate balance. Grounded in communication theory and praxis, Communication Shock brings some objectivity to the discussion of technology, maps its development, and encourages a rational conversation about its potential problems and promise. It challenges readers to reach their own conclusions about the future, imagined and unimaginable, about the fundamental values in conflict and how one might choose to embrace or contest them to maintain individual autonomy in the face of increasingly ubiquitous marketing and technological change. Present and emerging communications technologies hold the promise for a bold new future, but they also have their inherent risks and drawbacks. Communication shock is the human response, conscious or unconscious, wherein the individual chooses to resist the growing pervasiveness of technology in his or her life by seeking ways to reduce or redirect new technologies or to reject the addition of such technologies altogether. Here is a framework for understanding the potential of the evolving technologies, determining which are essential and which are distractions from the life that one believes to be meaningful, and making informed choices for the life one wishes to live.

Brad Stone, Can the Asian giant beat Apple? Based on years of reporting on Samsung for the Economist, the Wall Street Journal, and Time from his base in South Korea and his countless sources inside and outside the company, Geoffrey Cain offers the first deep look behind the curtains of the biggest company nobody knows. How has this happened? Forty years ago, Samsung was a rickety Korean agricultural conglomerate that produced sugar paper and fertilizer. But with the rise of the PC revolution, Chairman Lee Byung-chul came up with an incredibly risky multimillion-dollar plan to make Samsung a major supplier of computer chips. Lee had been wowed by a young Steve Jobs who sat down with the chairman to offer his advice, and Lee quickly became obsessed with creating a tech empire. Today, Samsung employs over 350,000 people, over four times as many as Apple, and their revenues have grown 40 times their 1987 level. Samsung alone now makes up more than

20% of South Korea's exports and sells more smartphones than any other company in the world. And furthermore they don't just make their own phones but are one of Apple's chief suppliers on technology critical to the iPhone. Yet their disastrous recall of the Galaxy Note 7 with numerous reports of phones spontaneously bursting into flames reveals the dangers of the company's headlong attempt to overtake Apple at any cost. A sweeping insider account of the Korean company's ongoing war against the likes of Google and Apple. Samsung Rising shows how a determined and fearless Asian competitor is poised to take on the giants of the tech world.

China-Focused Cases CEIBS Case Center, 2019-03-01 This book is the first anthology compiled in English by the CEIBS Case Center to promote China-focused cases worldwide. Included are ten of twenty-six award-winning cases from the Global Contest for the Best China-Focused Cases during 2015 to 2017. These works exemplify the quality of effective business cases and share stories of China to the world. Each of the ten cases has a defining feature. Some cases with a focus on user demand analyze how companies build their core competence, e.g., Haidilao Hot Pot and OnePlus Mobile Phone, while others present an array of business innovations in the era of new retail, e-commerce, and the sharing economy, e.g., SF Express, Jinhuaobao of FamilyMart, and Handu Apparel. Some describe Chinese companies' operations in the overseas market, e.g., Huawei and TECNO, and others depict how foreign companies adapt to the Chinese market in a unique way, e.g., Starbucks. These cases were drawn from Chinese and overseas business schools. The book helps bridge the gap between the world management community's interest in China and the limited availability of China-focused management cases. We hope this collection of select cases will prove valuable and informative for our readers.
