Smart Products, Smarter Services Mary J. Cronin, 2010-08-19 We are surrounded by products that have minds of their own. Computing power in the form of microcontrollers, microprocessors, sensors, and data storage chips has become so cheap that manufacturers are building connectivity and embedded intelligence into all types of consumer goods. These smart products are fundamentally changing both the competitive landscape for business and the daily lives of consumers. This book analyzes the evolution of smart products to help managers understand the impact of embedded

product intelligence on corporate strategy consumer value and industry competition It describes four different ecosystem strategies for designing and launching smart products the control focused Hegemon the standards focused Federator the high growth and brand focused Charismatic Leader and the disruptive industry Transformer This ecosystem model is then applied to smart products in the automotive wireless energy residential and health industries The book concludes with recommendations for successfully managing smart products and services **Smart Home Systems** Mahmoud

Al-Qutayri,2010-02-01 Smart homes are intelligent environments that interact dynamically and respond readily in an adaptive manner to the needs of the occupants and changes in the ambient conditions The realization of systems that support the smart homes concept requires integration of technologies from different fields Among the challenges that the designers face is to make all the components of the system interact in a seamless reliable and secure manner Another major challenge is to design the smart home in a way that takes into account the way humans live and interact This later aspect requires input from the humanities and social sciences fields The need for input from diverse fields of knowledge reflects the multidisciplinary nature of the research and development effort required to realize smart homes that are acceptable to the general public The applications that can be supported by a smart home are very wide and their degree of sophistication depends on the underlying technology used Some of the application areas include monitoring and control of appliances security telemedicine entertainment location based services care for children and the elderly etc This book consists of eleven chapters that cover various aspects of smart home systems *Internet of Things* Niranjana Lal,Shamimul Qamar,Sanyam
