The Journal of Mental Science, 1934 *The Science and Art of Sensory Processing Sensitivity* Bianca P. Acevedo, 2024-07-25

The Science and Art of Sensory Processing Sensitivity provides an up to date and novel scientific perspective on the biologically based Sensory Processing Sensitivity (SPS) trait which is associated with enhanced awareness, depth of cognitive processing and heightened responsivity to the environment and other individuals. This second volume by Bianca P. Acevedo following *The Highly Sensitive Brain* takes a scientific perspective on its exploration of SPS but adds to the existing body of literature on high sensitivity by including an enhanced discussion on the proposed mechanisms linking it with depression, anxiety and burnout. In addition, this second volume explores SPS relationship to other relevant personality traits such as the Big Five, creativity and sensation seeking and sheds light on how their varying combinations give rise to different outcomes for highly sensitive persons (HSPs). A unique contribution of this volume is its detailed examination of the role of culture, gender, biology, aging and the environment, including the workplace, on the expression or repression of high sensitivity. Also, unlike previous books, this volume takes a broad perspective on outcomes related to being highly sensitive to shine a light on the non-trivial issue plaguing many HSPs: diminished quality of life, happiness and well-being. As such, a major contribution of the second volume on the science of SPS is its extensive description of scientifically based techniques that might improve the quality of life for those with high SPS. Thus, this volume may appeal to a wide audience including both HSPs and those in their social network: friends, partners, physicians, parents, educators and clinicians who wish to better understand SPS, those with the trait and how to enhance well-being among the highly sensitive. Describes the mechanisms and neurobiology underlying sensory processing sensitivity. Distinguishes SPS from seemingly related disorders including depression, burnout and neuroticism and proposes solutions. Uniquely explores variations in SPS and its association with different combinations of personality traits: extraversion, sensation seeking, creativity, openness and neuroticism with related outcomes. Describes techniques based in recent scientific advances to improve quality of life for individuals with SPS. Features implications of SPS in the workforce, education and personal relationships and explores the impact of gender, culture and aging on the expression of SPS.

Comprehensive Textbook of Community Health Nursing Including Environmental Science (Two Volume Set), First Edition - E-Book Neerja Sood, Sakshi Chaturvedi, 2025-04-07

This book has been written with student nurses' learning needs in mind and it fully covers the Indian Nursing Council's new revised syllabus for nursing degree and diploma courses. Although it primarily intends to cater to the curriculum demands of BSc Nursing and GNM students, it will also be extremely valuable for students of various other streams studying community health courses: MLHP, CCH and MPH courses. The main principles have been conveyed in clear terms from the students' perspective. The global and national health scenario and community health nursing principles are considered while explaining the role of community health nurses. Designed to meet the curricular needs of student nurses. Relevant case studies and examples.
