Film and Tourism Marco Valeri, 2025-04-01 Film tourism has emerged as a major driver of tourism development for many destinations To date there has been substantial literature on the subject but little of it has engaged with the wider social science paradigm of culture film and media research The intellectual components of film tourism as an area of academic inquiry span several academic subjects such as marketing economics finance psychology social development sustainability and operations Film is a relatively obscure area of tourism research but the wider interconnections between tourism space and media are beginning to be explored and understood The interest which the topic has generated highlights this subject as one that is worthy of attention within both the academic community and in a practitioner context The contributions in this book discuss the debates about the perceived and actual impact of film tourism and what must still be learned about this phenomenon to create the most unique and satisfying visitor experiences and protect the communities and environments that it affects Fundamental questions are raised regarding the real demand for and draw of film as a tourism motivator and the range of assumptions conflicts and contradictions that underlie them *Digital Degrowth* Michael

Kwet, 2024-08-20 A fascinating book that takes degrowth in new directions Jason Hickel author of *Less is More* A must read for anyone who wants to know the brutal truth of digital colonialism driven by the American empire Kohei Saito author of *Slow Down* The world is racing toward an irreversible ecological catastrophe Environmental science makes clear that humans must reduce total material resource use requiring a radical redistribution of wealth within and between countries Yet little attention has been paid to how the digital economy fits into this equation Michael Kwet a leading expert on digital colonialism presents a new paradigm for the digital society Merging the science of degrowth with a global analysis of the high tech economy he argues that digital capitalism and colonialism must be abolished quickly In *Digital Degrowth* Kwet

maps out a path to a people's tech future. He calls for direct action against Silicon Valley US imperialism and power elites everywhere in order to realize a radically egalitarian digital society that fosters equality in harmony with nature. **Pivoting and Producing for Online TV** Alexa Scarlata, 2025-05-02 The introduction and diffusion of international subscription video on demand (SVOD) services in the 2010s represented the most significant disruption of established national broadcast and pay TV ecologies in their long history. Using an in-depth Australian case study, this book narrates this profound period of proliferation. It also considers how incumbent commercial networks, pay TV providers and public service broadcasters developed into online TV providers, albeit in assorted ways. In so doing, it conceives of the early impact of online TV, 2015–2020 more broadly, and acknowledges the role of both new and old TV players. The industry-wide shift towards online TV over this period also impacted existing television drama production cultures. SVOD services provided a fruitful avenue for the distribution of existing archives and slowly began to support the production of new Australian content with an increasingly global focus. However, the formal arrival of online TV certainly did not usher in the boom in original local television drama many anticipated. **Pivoting and Producing for Online TV: Australia's Transition** advances the macro analysis of television production strategies. This book will be useful to students and researchers interested in media, film and cultural studies.

Distribution Evolution Elliott W. Nikdel, 2025-09-18 **Distribution Evolution: On Demand and the Relocation of Specialized Film** looks beyond the rhetoric and beneath the gleaming surfaces of on demand to reveal a more complex picture than the narrative of disruption. Welcome to the age of on demand. This is a world replete with choice, a world where consumers dictate the terms of their viewing experience, choosing what to watch, when and how, a world devoid of monopoly where the niche and undiscovered stand shoulder to shoulder with the rich and the powerful. These stories of disruption have come to shape the popular perception of on demand, but does this vision paint an accurate portrait of today's streaming landscape? **Distribution Evolution** assesses whether digital distribution is the democratising force we were promised. Does on demand disrupt and displace the monopolistic practices and patterns that have long curtailed the wider reach of specialised film? Or does this vision of disruption resemble little more than a fantasy crafted by gifted storytellers and cunning marketers? To answer these questions, **Distribution Evolution** looks to the past to form a picture of the present. Whether it be the emergence of new practices or the persistence of old ones, the book reveals how a complex interplay between past and present is shaping the digital future. The resulting work provides a new framework through which to understand the on demand era as a process of relocation, not transformation; evolution, not revolution.
