EN Technology education exists in the tension between societal transformations and digital developments The conference proceedings of the annual meeting of the Deutsche Gesellschaft für Technische Bildung DGTB titled Futures of Technology Education bring together a wide range of contributions that address current discourses and research perspectives in technology education A first thematic focus is on the role of digitalization From an international perspective the development of general technology education in Sweden is

examined highlighting the shift from traditional workshop formats to curriculum anchored digital content Numerous contributions discuss the challenges opportunities and didactic models for teaching digital technologies for example through the use of generative AI structured pedagogical approaches to digitalization or considerations of how to integrate data literacy and machine learning into curricula In addition institutional cooperation formats for fostering digital competencies in prospective teachers as well as training concepts for the transition from primary to lower secondary education are presented A second focus lies on the integration of making and creativity into technology education The volume explores theoretical concepts of maker education alongside task formats and competence development Both potentials such as motivation and self reflection and challenges for instance in the area of technology assessment are addressed The out of school perspective on makerspaces as learning environments is also taken into account especially with regard to structural barriers to cooperation with schools A third area of focus is dedicated to classroom practice interdisciplinarity and inclusion The volume includes contributions on technology education in special education contexts on the reconstruction of historical teaching concepts and on combining analog and digital learning in primary science and technology education Exemplary teaching practices such as methodical teaching sequences or the technical analysis of questionable products illustrate how multi perspective understanding of technology and problem solving learning can be promoted Questions surrounding the professionalization of teachers in general technology education especially in the tension between theory and practice are also addressed Further contributions examine future teacher workforce needs new target groups for teacher education as well as overarching issues such as international comparative perspectives and the critical reflection of artificial intelligence in the education sector The proceedings show The future of technology education is diverse dynamic and shaped by a wide range of research questions The interdisciplinary nature of the contributions underscores the importance of general technology education in the context of profound societal change

Labour Law in Russia Anthony Forsyth,Elena Radevich,2014-11-10
Russias transition towards a market economy in the early 1990s called for new approaches to the regulation of employment relations in the post Soviet period in order to strike a balance between employers interests and employees rights in changed conditions The adoption of the Labour Code of the Russian Federation LC RF in 2001 contributed to solving the issue only partly as in reality it was passed as a compromise between different political forces and consists of both provisions which can be implemented in the new context of the market economy and restrictions inherited from the planned economy The recent and ever changing socio economic conditions and the increasing complexity of the employer employee relationship which is a result of both globalization and technological progress required the further development of Russian employment legislation This resulted in substantial amendments being made to the original LC RF in 2006 with the majority of its provisions being profoundly revised Nevertheless a thorough analysis of the changes currently under way shows that many aspects concerning employment relations have still not been addressed sufficiently The papers collected in the present volume of the

ADAPT Labour Studies Book Series consider the recent developments of the legal regulation of employment relations as well as some closely related aspects from a historical and comparative perspective in order to provide some insights into these issues and to examine current challenges Smartphone Operation Basics Mia Wright, AI, 2025-03-03 Smartphone Operation Basics demystifies the technology behind the devices we use daily offering a comprehensive look into their inner workings It explores how these complex tools connect us process data and function as multifaceted devices The book emphasizes understanding the core components of smartphones from hardware and software architecture to network technologies empowering users to navigate the digital landscape effectively The book begins with a historical overview tracing the evolution of mobile phones and progresses logically through hardware processors memory software operating systems apps and network technologies 4G 5G Wi Fi It highlights how smartphones have become indispensable for communication commerce and information while also delving into security concerns and privacy risks Readers will gain insights into optimizing device performance and making informed decisions about their smartphone use What sets this book apart is its practical approach translating technical concepts into actionable insights for everyday users It provides tips for troubleshooting enhancing performance and protecting privacy making it a valuable resource for anyone seeking to understand and maximize the potential of their smartphone **Make Spectacular Books** Sue Astroth, 2010-11-05 Sure to be Treasured Books You Can Make Today 22 projects feature lots of inspiration 3 unique techniques to create a huge variety of books Go wild with pockets accordion foldouts tabs and closures Create an unforgettable personal gift Get the kids involved they ll love decorating prepared books Whether you re an experienced scrapbooker a paper crafter quilter or beginner you re sure to find a perfect project in Sue s collection of handcrafted books Choose an occasion or theme round up fabric paper and embellishments then follow Sue s easy and fun directions Important Note about PRINT ON DEMAND Editions This title will be printed after purchase and will arrive separately from any in stock items Please allow approximately 2 weeks for USA delivery with an additional 2 weeks for international shipments Expedited shipping is not available on POD Editions The printing quality in this copy will vary from the original offset printing edition and may look more saturated due to printing on demand by a high quality printer on uncoated non glossy paper The information presented in this version is the same as the most recent printed edition Any pattern pullouts have been separated and presented as single pages *Make: Volume 95* Dale Dougherty, 2025-10-28 Amazing things are happening in low cost computing and Make is all over it In Make Volume 95 the big names Arduino and Raspberry Pi are pairing SBCs with MCUs in new products like we ve never seen before but independent board makers like BeagleBoard and IceWhale are hot on their heels Next get connected with the Meshtastic off grid communications network how it works and how to build a walkie textie handset node using LoRa radio boards Then CircuitPython and MicroPython compatibility are becoming a feature not an afterthought We ll also show you how to run CircuitPython on Make s own Oxocard ESP32 microcontroller and how to build a University of Michigan s time
