Medical Equipment Maintenance Binseng Wang,2012 Presents the basic elements of medical equipment maintenance and management required of healthcare leaders responsible for managing or overseeing this function It will enable these individuals to understand their professional responsibilities as well as what they should expect from their supervised staff and how to measure and benchmark staff performance Operations Management and Management Science Fausto Pedro García Márquez,2023-02-08 Operations Management and Management Science introduces the main concepts in this discipline It also considers case studies from several industries and the established and novel algorithms applied to solve them Future applications and trends are discussed and future work to improve the solutions presented is suggested Operations management may be defined as the efficient transformation of inputs to outputs according to the needs of customers and considering the limitations present in the process It involves process optimization from design to future requirements the management of materials and products production and other aspects such as maintenance and quality control In this case the products can be regarded as goods or services while the inputs are human resources financial support information material energy etc Clinical Engineering Handbook Ernesto Iadanza,2019-12-06 Clinical Engineering Handbook Second Edition covers modern clinical engineering topics giving experienced professionals the necessary skills and knowledge for this fast evolving field Featuring insights from leading international experts this book presents traditional practices such as healthcare technology management medical device service and technology application In addition readers will find valuable information on the newest research and groundbreaking developments in clinical engineering such as health technology assessment disaster preparedness decision support systems mobile medicine and prospects and guidelines on the future of clinical engineering As the biomedical engineering field expands throughout the world clinical engineers play an increasingly important role as translators between the medical engineering and business professions In addition they influence procedures and policies at research facilities universities and in private and government agencies This book explores their current and continuing reach and its importance Presents a definitive comprehensive and up to date resource on clinical engineering Written by worldwide experts with ties to IFMBE IUPESM Global CE Advisory Board IEEE ACCE and more Includes coverage of new topics such as Health Technology Assessment HTA Decision Support Systems DSS Mobile Apps Success Stories in Clinical Engineering and Human Factors Engineering **Computer-Aided Detection of Architectural Distortion in Prior Mammograms of Interval Cancer** Shantanu Banik,Rangaraj Rangayyan,J.E. Leo Desautels,2022-05-31 Architectural distortion is an important and early sign of breast cancer but because of its subtlety it is a common cause of false negative findings on screening mammograms Screening mammograms obtained prior to the detection of cancer could contain subtle signs of early stages of breast cancer in particular architectural distortion This book presents image processing and pattern recognition techniques to detect architectural distortion in prior mammograms of

interval cancer cases The methods are based upon Gabor filters phase portrait analysis procedures for the analysis of the angular spread of power fractal analysis Laws texture energy measures derived from geometrically transformed regions of interest ROIs and Haralick's texture features With Gabor filters and phase portrait analysis 4 224 ROIs were automatically obtained from 106 prior mammograms of 56 interval cancer cases including 301 true positive ROIs related to architectural distortion and from 52 mammograms of 13 normal cases For each ROI the fractal dimension the entropy of the angular spread of power 10 Laws texture energy measures and Haralick's 14 texture features were computed The areas under the receiver operating characteristic ROC curves obtained using the features selected by stepwise logistic regression and the leave one image out method are 0.77 with the Bayesian classifier 0.76 with Fisher linear discriminant analysis and 0.79 with a neural network classifier Free response ROC analysis indicated sensitivities of 0.80 and 0.90 at 5.7 and 8.8 false positives FPs per image respectively with the Bayesian classifier and the leave one image out method The present study has demonstrated the ability to detect early signs of breast cancer 15 months ahead of the time of clinical diagnosis on the average for interval cancer cases with a sensitivity of 0.8 at 5.7 FP image The presented computer aided detection techniques dedicated to accurate detection and localization of architectural distortion could lead to efficient detection of early and subtle signs of breast cancer at pre mass formation stages

Concurrent Engineering in the 21st Century Josip Stjepandić, Nel Wognum, Wim J.C. Verhagen, 2015-01-30 Presenting the gradual evolution of the concept of Concurrent Engineering CE and the technical social methods and tools that have been developed including the many theoretical and practical challenges that still exist this book serves to summarize the achievements and current challenges of CE and will give readers a comprehensive picture of CE as researched and practiced in different regions of the world Featuring in depth analysis of complex real life applications and experiences this book demonstrates that Concurrent Engineering is used widely in many industries and that the same basic engineering principles can also be applied to new emerging fields like sustainable mobility Designed to serve as a valuable reference to industry experts managers students researchers and software developers this book is intended to serve as both an introduction to development and as an analysis of the novel approaches and techniques of CE as well as being a compact reference for more experienced readers

Fractal Analysis of Breast Masses in Mammograms Thanh M. Cabral, Rangaraj M. Rangayyan, 2022-06-01 Fractal analysis is useful in digital image processing for the characterization of shape roughness and gray scale texture or complexity Breast masses present shape and gray scale characteristics in mammograms that vary between benign masses and malignant tumors This book demonstrates the use of fractal analysis to classify breast masses as

benign masses or malignant tumors based on the irregularity exhibited in their contours and the gray scale variability exhibited in their mammographic images A few different approaches are described to estimate the fractal dimension FD of the contour of a mass including the ruler method box counting method and the power spectral analysis PSA method Procedures are also described for the estimation of the FD of the gray scale image of a mass using the blanket method and the PSA method To facilitate comparative analysis of FD as a feature for pattern classification of breast masses several other shape features and texture measures are described in the book The shape features described include compactness spiculation index fractional concavity and Fourier factor The texture measures described are statistical measures derived from the gray level cooccurrence matrix of the given image Texture measures reveal properties about the spatial distribution of the gray levels in the given image therefore the performance of texture measures may be dependent on the resolution of the image For this reason an analysis of the effect of spatial resolution or pixel size on texture measures in the classification of breast masses is presented in the book The results demonstrated in the book indicate that fractal analysis is more suitable for characterization of the shape than the gray level variations of breast masses with area under the receiver operating characteristics of up to 0.93 with a dataset of 111 mammographic images of masses The methods and results presented in the book are useful for computer aided diagnosis of breast cancer
