The Enchantment of Western Herbal Medicine Guy Waddell, 2020-01-30 Through interviews with British herbalists, the importance of hidden experiences of meetings with plants is explored alongside how such enchantment has influenced the narrative of their lives. Some herbalists have visible entryways into studying such as personal experience of taking herbal medicine, a search for a new career or a love of nature. Other entryways are more hidden, with many noting crossings and callings with plants at a young age. This sensual ability of herbs raises questions about the agency of living plants and of herbal medicines and about how the relationship between herbalists and plants may be reconceived. Meetings with plants and herbal medicines allow herbalists to draw easily from a diverse range of influences that others may see as incommensurable. This fascinating, original and challenging book convincingly explores modern-day herbalists' understanding of their place in the complementary health world against the backdrop of encroaching professionalisation, legitimacy and scientism. In his case study interviews with herbalists, Guy Waddell draws our attention to the enchanting power of plants and their agentic qualities. In his quest for greater understanding of their sensual power, the author rejects the conventional modernity rationalisation thesis seen both in the sensual affective energy that herbalists draw upon and in the ontological implications of human/nonhuman crossings. This book is an excellent contribution to our understanding of Western herbal medicine and contemporary thought. Dr Stuart McClean, PhD Associate Professor in Public Health, Health and Wellbeing, University of the West of England. In the field of herbal medicine, few seem to know their history and the lessons it teaches us. In *The Enchantment of Western Herbal Medicine*, Dr Guy Waddell not only provides the reader with a detailed history of the trials and triumphs of British Phytotherapy but also travels into uncharted territory looking at how herbalists come to find their passion for plants and the use of them to help heal others. This is a new area of research and exploring the entryways to practice through interviews and clinician narratives is both a fascinating undertaking and a unique way of understanding our own motivations and experiences as herbalists. David Winston, RH, AHG, DSc, hc, author of *Adaptogens: Herbs for Strength, Stamina and Stress Relief*. Both compelling and challenging, Guy Waddell's unique book is filled with the voices of herbalists and makes essential
