Social Causes of Health and Disease William C. Cockerham, 2013-01-22 In this stimulating book William C Cockerham a leading medical sociologist assesses the evidence that social factors such as stress poverty unhealthy lifestyles and unpleasant living and work conditions have direct causal effects on health and many diseases Noting a new emphasis upon social structure in both theory and multi level research techniques the author argues that a paradigm shift has been emerging in 21st century medical sociology which looks beyond individual explanations for health and disease The field has headed toward a fundamentally different orientation and Cockerham s work has been at the forefront of these changes The second edition of his compelling account has been thoroughly revised and updated with further contemporary developments and also includes an expanded discussion of the relationship between race and health as well as new material on health care reform and social policy This engaging text will be indispensable reading for all students and scholars of medical sociology especially those with the courage to confront the possibility that society really does make people sick

The Social Causes of Health and Disease William C. Cockerham, 2026-02-09 This masterful guide to the social determinants of health has become a go to text for understanding the role that social factors play in the experience of health and many diseases In this updated edition preeminent medical sociologist William C Cockerham offers the most compelling case yet that stress poverty unhealthy lifestyles and adverse living and working conditions can all be directly associated with illness Looking beyond individual explanations for health and disease Cockerham marshals evidence and theory for those seeking a clear and authoritative overview of the social causes of health and illness Of particular note in this revised edition are updates on the power of social class to determine a person s health and life span deeper consideration of how the social construction of race matters for a person s physical and mental health new research on the role of lifestyles as a social determinant of health and an analysis of the differential impacts of the Covid 19 pandemic This engaging introduction to social epidemiology will be indispensable reading for all students and scholars of medical sociology especially those with the courage to confront the possibility that society really does make people sick

Sociological Theories of Health and Illness William C. Cockerham, 2020 Sociological Theories of Health and Illness reviews the evolution of theory in medical sociology beginning with the field s origins in medicine and extending to its present day standing as a major sociological subdiscipline Sociological theory has an especially important role in the practice of medical sociology because its theories distinguish the subdiscipline from virtually all other scientific fields engaged in the study of health and illness The focus is on contemporary theory because it applies to contemporary conditions however since theory in sociology is often grounded in historical precedents and classical foundations this material is likewise included as it relates to medical sociology today This book focuses on the most commonly used sociological theories in the study of health and illness illustrating their utility in current examples of empirical research on a wide range of topics The qualitative or quantitative research methods applicable to

specific theories are also covered Distinctions between macro and micro level levels of analysis and the relevance of the agency structure dichotomy inherent in all theories in sociology are discussed Beginning with classical theory Durkheim Weber and Marx and the neglected founders Gilman Martineau and DuBois along with symbolic interaction Mead Strauss and labeling theory Becker and poststructuralism and postmodernism Foucault coverage is extended to contemporary medical sociology Discussion of the stress process model Pearlin is followed by the social construction of gender and race and intersectionality theory Collins health lifestyle theory Cockerham life course theory Elder fundamental cause theory Link and Phelan and theories of the medical profession Freidson medicalization and biomedicalization Conrad Clarke and social capital Bourdieu Putnam and Lin
