Bioethics, Medicine and the Criminal Law: Volume 3, Medicine and Bioethics in the Theatre of the

Criminal Process Margaret Brazier, Suzanne Ost,2013-05-02 To date little analysis exists of the criminal process's roles as a regulator of medical practice and as an arbiter of bioethics nor whether criminal law is an appropriate forum for judging ethical medical dilemmas The conscription of criminal law into moral controversy and the perceived rise in criminal investigations of medical errors sets the backdrop for this innovative historical and theoretical analysis of the relationship between medicine bioethics and the criminal process Case studies on abortion end of life and the separation of conjoined twins reveal how judges grapple with bioethics in criminal cases and the impact of theatre on the criminal law's response to ethically controversial medical cases A central argument is that bioethics and criminal law are not necessarily incompatible rather it is the theatre surrounding interactions between bioethics and criminal law that often distorts and creates tension

Bodies Politic Roy Porter,2021-03-08 In this historical tour de force Roy Porter takes a critical look at representations of the body in health disease and death in Britain from the mid seventeenth to the twentieth century Porter argues that great symbolic weight was attached to contrasting conceptions of the healthy and diseased body and that such ideas were mapped onto antithetical notions of the good and the bad the beautiful and the ugly With these images in mind he explores aspects of being ill alongside the practice of medicine paying special attention to self presentations by physicians surgeons and quacks and to changes in practitioners public identities over time Porter also examines the wider symbolic meanings of disease and doctoring and the body politic Porter's book is packed with outrageous and amusing anecdotes portraying diseased bodies and medical practitioners alike

Bioethics, Medicine, and the Criminal Law Amel Alghrani, Rebecca Bennett, Suzanne Ost,2013 Who should define what constitutes ethical and lawful medical practice Judges Doctors Scientists Or someone else entirely This volume analyses how effectively criminal law operates as a forum for resolving ethical conflict in the delivery of health care It addresses key questions such as how does criminal law regulate controversial bioethical areas What effect positive or negative does the use of criminal law have when regulating bioethical conflict And can the law accommodate moral controversy By exploring criminal law in theory and in practice and examining the broad field of bioethics as opposed to the narrower terrain of medical ethics it offers balanced arguments that will help readers form reasoned views on the

ethical legitimacy of the invocation and use of criminal law to regulate medical and scientific practice and bioethical issues

Disability, Medicine, and Healing Discourse in Early Christianity Susan R. Holman, Chris L. de Wet, Jonathan L. Zecher, 2023-08-04 Using contemporary theories drawn from health humanities this volume analyses the nature and effects of disability medicine and health discourse in a variety of early Christian literature In recent years the medical turn in early Christian studies has developed a robust literature around health disability and medicine and the health humanities have made critical interventions in modern conversations around the aims of health and the nature of healthcare Considering these developments it has become clear that early Christian texts and ideas have much to offer modern conversations and that these texts are illuminated using theoretical lenses drawn from modern medicine and public health The chapters in this book explore different facets of early Christian engagement with medicine either in itself or as metaphor and material for theological reflections on human impairment restoration and flourishing Through its focus on late antique religious texts the book raises questions around the social rather than biological aspects of illness and diminishment as a human experience as well as the strategies by which that experience is navigated The result is an innovative and timely intervention in the study of health and healthcare that bridges current divides between historical studies and contemporary issues Taken together the book offers a prismatic conversation of perspectives on aspects of care at the heart of societal and individual wellness today inviting readers to meet or revisit patristic texts as
