Medieval Technology And Social Change:

Medieval Technology and Social Change Lynn White (Jr.),1962 Bibliography [Fifty Years of Medieval Technology and Social Change](#) Steven A. Walton,2019-08-22 This volume brings together a series of papers at Kalamazoo as well as some contributed papers inspired by the fiftieth anniversary of the publication of Lynn White Jr s *Medieval Technology and Social Change* 1962 a slim study which catalyzed the study of technology in the Middle Ages in the English speaking world While the initial reviews and decades long fortune of the volume have been varied it is still in print and remains a touchstone of an idea and a time The contributors to the volume therefore both investigate the book itself and its fate and look at new research furthering and inspired by White s work The book opens with an introduction surveying White s career with a bibliography of his work as well as some opening thoughts on the study of medieval technology in the last fifty years Three papers then deal explicitly with the reception and longevity of his work and its impact on medieval studies more generally Then five papers look at new cast studies areas where White s work and approach has had a particular impact namely medieval technology studies and medieval rural ecological studies **Medieval Technology and Social Change** Lynn

White (Jr.),1964 **Medieval Technology and Social Change** Lynn Townsend White,1967 [Medieval Technology and Social Change](#) Lynn White,1976 **Why Europe?** Michael Mitterauer,2010-07-15 Why did capitalism and colonialism arise in Europe and not elsewhere Why were parliamentary and democratic forms of government founded there What factors led to Europe s unique position in shaping the world Thoroughly researched and persuasively argued Why Europe tackles these classic questions with illuminating results Michael Mitterauer traces the roots of Europe s singularity to the medieval era specifically to developments in agriculture While most historians have located the beginning of Europe s special path in the rise of state power in the modern era Mitterauer establishes its origins in rye and oats These new crops played a decisive role in remaking the European family he contends spurring the rise of individualism and softening the constraints of patriarchy Mitterauer reaches these conclusions by comparing Europe with other cultures especially China and the Islamic world while surveying the most important characteristics of European society as they took shape from the decline of the Roman empire to the invention of the printing press Along the way Why Europe offers up a dazzling series of novel hypotheses to explain the unique evolution of European culture **Medieval Technology and Social Change** Lynn Townsend White,1974

Medieval Technology and Social Change White Lynn,1962 **The Colonizer's Model of the World** J. M. Blaut,2012-07-23 This influential book challenges one of the most pervasive and powerful beliefs of our time that Europe rose to modernity and world dominance due to unique qualities of race environment culture mind or spirit and that progress for the rest of the world resulted from the diffusion of European civilization J M Blaut persuasively argues that this doctrine is not grounded in the facts of history and geography but in the ideology of colonialism Blaut traces the colonizer s model of the world from its 16th century origins to its present form in theories of economic development modernization and new world

Campbell, 2023-05-31 Until recently historians tended to stress the perceived technological and ecological shortcomings of medieval agriculture The ten essays assembled in this volume offer a contrary view Based upon close documentary analysis of the demesne farms managed for and by lords they show that by 1300 in the most commercialized parts of England production decisions were based upon relative factor costs and commodity prices Moreover when and where economic conditions were ripe and environmental and institutional circumstances favourable medieval cultivators successfully secured high and ecologically sustainable levels of land productivity They achieved this by integrating crop and livestock production into the sort of manure intensive systems of mixed husbandry which later underpinned the more celebrated output growth of the seventeenth and eighteenth centuries If medieval agriculture failed to fulfill the production potential provided by wider adoption of such systems this is more appropriately explained by the want of the kind of market incentives that might have justified investment innovation and specialization on the scale that characterized the so called agricultural revolution than either the lack of appropriate agricultural technology or the innate backwardness of medieval cultivators Philosophy and Technology Carl Mitcham, Robert Mackey, 1983 From editors Carl Mitcham and Robert Mackey comes an unusually reflective and wide ranging colloquium on technology as a philosophical problem Organized into sections on conceptual issues ethical and political critiques religious critiques existentialist critiques and metaphysical studies *Philosophy and Technology* features an introductory overview that suggests the aims of truly comprehensive philosophy of technology *Philosophy and Technology* features essays by Jacques Ellul Lewis Mumford Ortega y Gasset and C S Lewis This revised and fully updated edition features a comprehensive bibliography **Medieval Chivalry** Richard W. Kaeuper, 2016-05-19 Richard Kaeuper presents a

new analysis of chivalry re interpreting it as a fundamental aspect of medieval society *Handbook of Medieval Studies* Albrecht Classen, 2010-11-29 This interdisciplinary handbook provides extensive information about research in medieval studies and its most important results over the last decades The handbook is a reference work which enables the readers to quickly and purposely gain insight into the important research discussions and to inform themselves about the current status of research in the field The handbook consists of four parts The first large section offers articles on all of the main disciplines and discussions of the field The second section presents articles on the key concepts of modern medieval studies and the debates therein The third section is a lexicon of the most important text genres of the Middle Ages The fourth section provides an international bio bibliographical lexicon of the most prominent medievalists in all disciplines A comprehensive bibliography rounds off the compendium The result is a reference work which exhaustively documents the current status of research in medieval studies and brings the disciplines and experts of the field together Technology Ethics Steven Umbrello, 2024-06-10 Technologies cannot simply be understood as neutral tools or instruments they embody the values of their creators and may unconsciously reinforce existing inequalities and biases Technology Ethics shows how responsible innovation can be achieved Demonstrating how design and philosophy converge the book delves into the intricate narratives that shape our understanding of technology from instrumentalist views to social constructivism Yet at its core it champions interactionism as the most promising and responsible narrative Through compelling examples and actionable tools this book unravels the nuances of these philosophical positions and is tailored to foster responsible innovation and thoughtful design As our everyday lives further intertwine with technology understanding and implementing these design principles becomes not just beneficial but essential This concise and accessible introduction is essential reading for students and scholars of philosophy of technology engineering ethics science and technology studies and human machine communication as well as policymakers Technology and Resource Use in Medieval Europe Michael Wolfe, Elizabeth Smith, 2021-12-16 The 10 essays here are the result of a conference devoted to the study of medieval technology in April 1995 Taken together they aim to help dispel the common misconception that medieval people somehow had to toil in a world bereft of technical innovation and ingenuity The authors of the papers all experts in their fields show the Middle Ages not only to be a time of considerable technological development but also the ways in which the technologies of building construction manufacture and metallurgy were shaped by broader forces of culture social identity political ambition and the local environment
