immortalitas demonstratur The title may contain a misreading by the printer mistaking animae immortalitas for animae immaterialitas as suspected already by A Baillet The book is made up of six meditations in which Descartes first discards all belief in things that are not absolutely certain and then tries to establish what can be known for sure He wrote the meditations as if he had meditated for six days each meditation refers to the last one as yesterday In fact Descartes began work on the Meditations in 1639 One of the most influential philosophical texts ever written it is widely read to this day The Meditations consist of the presentation of Descartes metaphysical system in its most detailed level and in the expanding of Descartes philosophical system which he first introduced in the fourth part of his Discourse on Method 1637 Descartes metaphysical thought is also found in the Principles of Philosophy 1644 which the author intended to be a philosophy guidebook

Descartes' Meditations on First Philosophy René Descartes, 2020-07-31 Ren Descartes is often described as the first modern philosopher but much of the content of his Meditations on First Philosophy can be found in the medieval period that had already existed for more than a thousand years Does God exist If so what is his nature Is the human soul immortal How does it differ from the body What role do sense experience and pure reason play in knowing Descartes stands out from his predecessors because of the method he developed to treat these and other fundamental questions Drawing on his study of mathematics he searches for a way to establish absolutely certain conclusions based on indubitable premises His importance in modern philosophy lies in the challenge he offers to every subsequent thinker in philosophy and science The French philosopher Descartes is often called the Father of modern philosophy in the West His Discourse on Method presents the reason why his method of inquiry He was the quintessential rationalist subjecting all sense experience as doubtful and untrustworthy Rather than relying on external authority whether from other people or from God Descartes demands nothing less than absolute certainty that begins with the self and proceeds step by step with the rigor of logical and mathematical precision Even though he claims that he has proved the existence of God and explained God's nature even that core tenet must be established through rigorous logical argument No subsequent philosopher is able to ignore this bold and challenging foundation for all thinking Those who become his disciples as well as those who reject his way of thinking are all under his spell Many think they have broken that spell only to find that he has shaped them in ways that are not easy to escape
