Making Disciples, Making Leaders Steven P. Eason,2004-06-21 This book offers a model for selecting and training church officers that is grounded in spiritual discernment and development The book begins with a biblical understanding of leadership moves into consideration for how to train a Nominating Committee to select leaders according to the biblical vision and then offers a step by step plan for a training event with three components The training plan is designed to build up the church leaders spiritually and to set their work in the context of discipleship as well as to teach them some of the fundamentals of the rules of governance of their denomination The book concludes with concrete suggestions for how future work of the church board can be structured to reflect the emphasis highlighted in the training session

Why Study Talmud in the Twenty-First Century? Paul Socken,2009-10-29 The Talmud is the repository of thousands of years of Jewish wisdom It is a conglomerate of law legend and philosophy a blend of unique logic and shrewd pragmatism of history and science of anecdotes and humor Unfortunately its sometimes complex subject matter often seems irrelevant in today s world In this edited volume sixteen eminent North American and Israeli scholars from several schools of Jewish thought grapple with the text and tradition of Talmud talking personally about their own reasons for studying it Each of these scholars and teachers believes that Talmud is indispensable to any serious study of modern Judaism and so each essay challenges the reader to engage in his or her own individual journey of discovery The diverse feminist rabbinic educational and philosophical approaches in this collection are as varied as the contributors experiences Their essays are accessible personal accounts of their individual discovery of the Talmud reflecting the vitality and profundity of modern religious thought and experience

Good Laboratory Practice Jürg P. Seiler,2006-01-16 After more than twenty years of use Good Laboratory Practice or GLP has attained a secure place in the world of testing chemicals

and other test items with regard to their safety for humans and the environment. Gone are the days when the GLP regulations were hotly debated amongst scientists in academia and industry and were accused of stifling flexibility in imaginative approaches to and science based conduct of all kinds of studies concerned with toxic effects and other parameters important for the evaluation and assessment of products submitted for registration and permission to market. The GLP regulations have developed from rules on how to exactly document the planning, conduct and reporting of toxicity studies to a quality system for the management of a multitude of study types from the simple determination of a physical chemical parameter to the most complex field studies or ecotoxicology studies. At the same time the term Good Laboratory Practice has become somewhat of a slogan with the aim to characterise any reliably conducted laboratory work.
