Modern Organic Synthesis George S. Zweifel, Michael H. Nantz, Peter Somfai, 2017-03-27 This book bridges the gap between sophomore and advanced graduate level organic chemistry courses providing students with a necessary background to begin research in either an industry or academic environment. Covers key concepts that include retrosynthesis, conformational analysis and functional group transformations as well as presents the latest developments in organometallic chemistry and C-C bond formation. Uses a concise and easy to read style with many illustrated examples. Updates material examples and references from the first edition. Adds coverage of organocatalysts and organometallic reagents.

Heterogeneous Catalysts Katabathini Narasimharao, Huda Sharbini Kamaluddin, 2025-03-03 Heterogeneous catalysis is at the core of chemical manufacturing. The book covers the importance of surfaces, interfaces and nanoscale materials in heterogeneous catalysis. It covers the synthesis of inorganic and nanosized inorganic catalysts and includes green synthesis methods. It describes characterization techniques and discusses challenges and opportunities in the scale up of catalysts production.

Stereochemistry M. Nógrádi, 2013-10-22 Stereochemistry: Basic Concepts and Applications is a three chapter text that introduces the basic principles and concepts of stereochemistry as well as its application to organic chemistry application. Chapter 1 describes first the stereochemistry of the ground state specifically the configuration and conformation of organic compounds as well as the most important methods for its investigation. This chapter also deals with the kinetics of conformational changes and provides an overview of the so called applied stereochemistry. Chapter 2 focuses on the analysis of the internal motions of the molecules and of the corresponding activation energies. This chapter also examines the principles of intramolecular symmetry. Chapter 3 considers the stereochemical aspect of several enzymic processes and the stereoisomerism of monotonic polymers and inorganic complexes. This book will be of great value to organic chemists and organic chemistry graduate students.

Utilisation of Bioactive Compounds from Agricultural and Food Production Waste Quan V. Vuong, 2017-09-07 The large quantity of waste generated from agricultural and food production remains a great challenge and an opportunity for the food industry. As there are numerous risks associated with waste for humans, animals and the environment, billions of dollars are spent on the treatment of agricultural and food waste. Therefore the utilisation of bioactive

compounds isolated from waste not only could reduce the risks and the costs for treatment of waste but also could potentially add more value for agricultural and food production This book provides comprehensive information related to extraction and isolation of bioactive compounds from agricultural and food production waste for utilisation in the food cosmetic and pharmaceutical industries The topics range from an overview on challenges and opportunities related to agricultural and food waste the bioactive compounds in the waste the techniques used to analyse extract and isolate these compounds to several specific examples for potential utilisation of waste from agricultural and food industry This book also further discusses the potential of bioactives isolated from agricultural and food waste being re utilised in the food cosmetic and pharmaceutical industries It is intended for students academics researchers and professionals who are interested in or associated with agricultural and food waste Multicomponent Synthesis Basudeb Basu,Bubun Banerjee,2023-12-31

Multicomponent synthesis may provide new and green routes for obtaining bioactive heterocycles These methods produce less organic waste due to no longer removing solvent and other components between reaction steps It can be applied to the synthesis of heterocycles with reactions such as the Biginelli reaction This book explores the use of multi component reactions for various heterocyclic structures with bioactivity
