and Technical Books and Serials in Print ,1989 **Chemistry of Plants and Insects** Margareta Séquin,2017-06-16

Have you ever wondered how plants attract certain insects or how insects communicate with each other This book explains the natural chemical compounds that determine the fascinating interactions between plants and insects providing a gentle and absorbing introduction to organic chemistry that is highly relevant to everyday life and to the natural world Specific organic compounds and intriguing chemistry determine whether insects are keen on feeding on plants or avoid certain plants altogether Some insects have learned to use plant compounds as their own defences and some plants use digestive processes to use insects as nutritional supplements Plant insect interactions are vital for our food supply for pollination of orchards or detrimentally in insect infestations of crops as well as in applications like silk production By the author of the popular book The Chemistry of Plants Perfumes Pigments and Poisons this book benefits from Margareta Séquin's vast experience leading field trips and seminars to botanical gardens and nature reserves and teaching chemistry to beginners Organic chemistry is often seen as a challenging sometimes abstract field This book makes chemistry exciting and accessible for readers interested in a deeper understanding of the natural world The book is organized according to the increasing complexity of compounds introduced and so it also serves as a useful teaching aid for undergraduate chemistry or biology courses and as a supplementary text for students in plant sciences ecology and entomology and in horticultural programs **Medical Books and Serials in Print** ,1984 **The Science Teacher** ,1998 Some issues are accompanied by a CD ROM on a selected topic
