 Headache and Migraine Treatment** MobileReference,2007 Headache is often due to build up of stress and tension
 Acupressure is an effective way to relieve painful sensation associated these conditions This guide by Aaron Stein PhD is
 based on over 5 000 years of Chinese practice of self acupressure Features Step by step guide to relieving headaches and
 migraines at 5 locations In the frontal region of the head frontal headache In the back of the head occipital headache On the
 side of the head temporal headache On the top of the head vertex headache Pain in the eye headache behind the eye Every
 step explains point location direction of force and duration of massage No previous experience necessary Total treatment
 duration 10 to 15 minutes How acupressure works Nobody knows how acupressure works Very often pain is caused by a self
 perpetuating mechanism pain causes the mind to be attentive to pain that in turn causes more pain and even more attention
 and so on Most likely acupressure works by interrupting this vicious circle How does acupressure interrupt the cycle
 Stimulation of active points is thought to lead to increased release of endorphins Endorphin is a natural body painkiller
 Endorphin and morphine are chemically different molecules but by coincidence they have very similar 3 dimensional shape
 This similarity in shape allows morphine to bind the endorphin receptor and reduce pain Thus endorphin released by
 acupressure stimulation may lead to temporal reduction of mind s attention to pain interruption of pain cycle and following
 complete cessation of pain **Predictions, Hoaxes, and a Guaranteed Way to Become Telepathic... If You're
