

The background of the entire cover is a black and white photograph. It depicts several industrial smokestacks in the lower half of the frame, each emitting a thick, dark plume of smoke that rises into the sky. The sky is filled with large, dramatic clouds, with a bright light source, possibly the sun, breaking through the clouds on the right side, creating a strong contrast and highlighting the texture of the smoke and clouds.

Wonder as a New Starting Point for

Theological Anthropology José Francisco Morales Torres, 2023-04-04 In Wonder as a New Starting Point for Theological Anthropology Opened by the World Jos Francisco Morales Torres constructs a new theological anthropology that begins with wonder He contends that the visceral experience of wonder is an opening up of the human by an excess that saturates the world This opened by ness points to a transforming receptivity as the basis of the person and to an extravagant Generosity that grounds all creation Thus wonder which is grounded in generous Excess is not only a gift but a demand it calls for a liberative praxis that resist the forces that flatten the fullness of life into what is useful and profitable and that reduce the limitless worth of fellow humans to mere commodities to be exploited and exchanged at the altar of the idolatrous Market Wonder reveals a primordial receptivity in the human person which demands of us an ethic of sustainability that does not reduce the other to commodity a vulnerability that risks being opened by the other a commitment to solidarity and liberation that resist the forces of an insatiable idolatrous Market that seeks only to steal and kill and destroy **Irrationality of**

Capitalism and Climate Change Andrew Kolin, 2022-02-07 The overwhelming scientific evidence indicates that planet Earth is in the process of undergoing dramatic climate change which threatens to undermine the quality of life around the world Irrationality of Capitalism and Climate Change demonstrates how the roots of humanity s assault on the environment are directly associated with the origins of capitalism an irrational social system in which reproduction of capital on a global scale is destructive to the environment The author begins with a philosophical analysis of the role that reason and passion assume in social systems then traces the local and regional environmental effects of preindustrial social systems The author argues that nations are faced with a global challenge to construct life affirming policy that functions as an alternative to the global devastation that the accumulation of capital causes The book concludes by proposing rational socialism a life affirming social system that functions in harmony with the environment *You Have Been Told What Is Good* Paul O.

Ingram, 2016-09-12 The radical interdependency of justice compassion and solidarity of community working for the common good are ideals celebrated in the religious Ways of humanity Human beings at all times and in all places have known what is good but for reasons too numerous to count have failed to act justly and compassionately in communal harmony with one other and with the sentient beings with whom we share life on planet Earth Today the major justice issue confronting us is human caused environmental destruction running amok on this planet the only place in the universe where our species is alive Accordingly this book offers socially engaged dialogue between persons representing the world s religious Ways The natural sciences are included as a third partner The dialogue presented in this book is a powerful resource for confronting and stopping the causes of climate change But we must do so before it s too late **Political Theology of the Earth**

Catherine Keller, 2018-10-30 Amid melting glaciers rising waters and spreading droughts Earth has ceased to tolerate our pretense of mastery over it But how can we confront climate change when political crises keep exploding in the present Noted ecotheologian and feminist philosopher of religion Catherine Keller reads the feedback loop of political and ecological

depredation as secularized apocalypse Carl Schmitt's political theology of the sovereign exception sheds light on present ideological warfare racial ethnic economic and sexual conflict and hubristic anthropocentrism If the politics of exceptionalism are theological in origin she asks should we not enlist the world's religious communities as part of the resistance Keller calls for dissolving the opposition between the religious and the secular in favor of a broad planetary movement for social and ecological justice When we are confronted by populist authoritarian right wings founded on white male Christian supremacism we can counter with a messianically charged often unspoken theology of the now moment calling for a complex new public Such a political theology of the earth activates the world's entangled populations joined in solidarity and committed to revolutionary solutions to the entwined crises of the Anthropocene

Political Theology on Edge Clayton Crockett, Catherine Keller, 2021-12-07 In *Political Theology on Edge* the discourse of political theology is seen as situated on an edge that is on the edge of a world that is grappling with global warming a brutal form of neoliberal capitalism protests against racism and police brutality and the COVID 19 pandemic This edge is also a form of eschatology that forces us to imagine new ways of being religious and political in our cohabitation of a fragile and shared planet Each of the essays in this volume attends to how climate change and our ecological crises intersect and interact with more traditional themes of political theology While the tradition of political theology is often associated with philosophical responses to the work of Carl Schmitt and the critical attempts to disengage religion from his rightwing politics the contributors to this volume are informed by Schmitt but not limited to his perspectives They engage and transform political theology from the standpoint of climate change the politics of race and non Christian political theologies including Islam and Sikhism Important themes include the Anthropocene ecology capitalism sovereignty Black Lives Matter affect theory continental philosophy destruction and suicide This book features world renowned scholars and emerging voices that together open up the tradition of political theology to new ideas and new ways of thinking Contributors Gil Anidjar Balbinder Singh Bhogal J Kameron Carter William E Connolly Kelly Brown Douglas Seth Gaiters Lisa Gasson Gardner Winfred Goodwin Lawrence Hillis Mehmet Karabela Michael Northcott Austin Roberts No lle Vahanian Larry L Welborn

Transcultural Connections: Australia and China Greg McCarthy,Youzhong Sun,Xianlin Song,2021-10-25 This book is a unique and original contribution to the knowledge of transcultural engagement between the East and the West notably between China and Australia The collection explores how the global system universally interrelates East and West showing how this interrelatedness offers the promise of progress but can evoke the counteracting trend of tribal nationalism The book addresses the connectedness of human progress by exploring how globalization creates new dynamic interfaces between East and West and how rather than clashes of culture there are growing forms of reciprocity between civilizations and a shared awareness of how humanity is connected through knowledge and international mobility

The order of the world in house and state Wolf Rainer Wendt,2022-09-28 In the world the home and the state prove themselves and change as basic institutions of human coexistence They are the subject of a comparative study on an ecotheoretical basis In the global context the modes of social control have developed differently in the home and the state In and with them order is created in the world and for the individual and collective conduct of life The institutional frameworks of house and state in the world are ways of shaping existence that are juxtaposed in their European Occidental and East Asian forms Their discussion takes place along the ancient Greek basic concepts and forms of thought of the oikos the polis and the cosmos on the one hand and the ancient Chinese categories jia guo and tianxia on the other They are discussed with their ethical political and economic references in their traditional and contemporary meaning and with regard to their ecological sustainability The interest in a discursive understanding of sustainable life serving orders in the face of global challenges is the guiding principle

Organic Marxism Philip Clayton,Justin Heinzekehr,2014-09-19 This revolutionary book fuses the enduring legacy of socialism government for the common good with the best of the

environmental movement and the newest insights from sustainability studies The result is a manifesto a roadmap forward in the face of the growing environmental catastrophe which is the most complex crisis humanity has ever faced American conservatives like to say that Marxism was destroyed by its opponents and by the mistakes of Marxist governments Organic Marxism provides the definitive answer to this charge As we approach the planet s limits however there is no other option but to shift to an organic ecological civilization Clayton and Heinzekehr show how scientists and economists farmers and small business people artists and religious leaders are coming together around the globe building communities for the common good *T&T Clark Handbook of Christian Theology and Climate Change* Hilda P. Lane, 2023-05-31 The twentieth century was an era of socialist revolutionary transformations and significant social democratic reforms By the twenty first century these socialist inspired movements have largely disappeared their ideologies have been disavowed and their institutions dismantled and replaced by global neoliberal capitalism This book explores the social political and economic forces driving these movements in Western Europe and in the USSR explaining their initial triumphs and how they eventually faltered under the influence of global neoliberalism David Lane examines the nature and appeal of neoliberal capitalism and analyses current social and political proposals for its reform or replacement including statist forms of capitalism social democratic and ecological globalization reforms self sustaining autonomous communities and globalised forms of social democracy or socialism Outlining his own proposal to replace global neoliberal capitalism with political systems based on a combination of market socialism and state planning Lane provides important insights for ways forward and a challenge for parties seeking political and economic alternatives Organic Marxism Dean of Claremont

School of Theology Philip Clayton, Justin Heinzekehr, 2014-09-19 This revolutionary book fuses the enduring legacy of socialism government for the common good with the best of the environmental movement and the newest insights from sustainability studies The result is a manifesto in the tradition of Bill McKibben s Eaarth a roadmap forward in the face of the growing environmental catastrophe which is the most complex crisis humanity has ever faced Catherine Keller writes What

an unexpected discomfiting and important work If Marxism seemed to be abandoned in the West to a few academic leftists and nostalgic activists the authors bring it roaring back into relevance American conservatives like to say that Marxism was destroyed by its opponents and by the mistakes of Marxist governments Organic Marxism provides the definitive answer to this charge New economic evidence reveals that Marx's predictions are coming true in ways once thought impossible Today the wealthiest class the richest 1% possesses more wealth and power than ever before whereas the 99% are slipping economically and the majority of humans live in increasing poverty Above all else the global environmental crisis changes everything Clayton and Heinzekehr show how over the last decades rich individuals and multinational corporations have acted selfishly to increase their own wealth with devastating ecological consequences The data make it clear that the planet has reached the limits of its capacity The authors trace the unimaginable environmental and social consequences that scientists tell us global warming will bring mass extinctions food and water shortages violent weather rising oceans Why then do our governments continue to favor the wealthy Why do they take no action or actually worsen the situation Organic Marxism shows why the situation is not hopeless however The vast majority of humans favor sustainable systems and lifestyles With this growing support it's possible to begin laying the foundations for a new ecological civilization on this planet In these pages Clayton and Heinzekehr lay out the steps toward a fair and sustainable society one run not in the interests of the rich but for the common good This fresh energetic and revolutionary manifesto Santiago Slabodsky takes its leads from the core insights of Karl Marx from process philosophers in China Taoism and in the West Alfred North Whitehead from ecology and from the organic practices of sustainable communities This postmodern Marxism the authors argue is not deterministic and utopian It allows for market forces while limiting corruption and excessive profit taking by the wealthy In the end localized systems of production and trade steeped in the cultural traditions of a given people are far more sustainable and life affirming than a globalized economy run by the richest banks and multinational corporations The book is a call to action We can no longer sit by passively and allow unlimited consumption by the wealthy when it means that there will be nothing left for our grandchildren Without a planetary crisis the rich would remain in power As we approach the planet's limits however there is no other option but to shift to an organic ecological civilization Clayton and Heinzekehr show how scientists and economists farmers and small business people artists and religious leaders are coming together around the globe building communities for the common good
