International Handbook of Internet Research Jeremy Hunsinger, Lisbeth Klastorp, Matthew Allen, 2010-06-17 Internet research spans many disciplines From the computer or information sciences through engineering and to social sciences humanities and the arts almost all of our disciplines have made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network The possibility and extent of contributions of internet research vary across disciplines as do the purposes methods and outcomes Even the epistemological underpinnings

differ widely The internet then does not have a discipline of study for itself It is a eld for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this eld research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the int net as a eld for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give de nition to the eld and provide us with a particular topography that enables research and investigation Data Protection and Privacy, Volume 14 Dara Hallinan,Ronald Leenes,Paul De Hert,2021-12-16 This book brings together papers that offer conceptual analyses highlight issues propose solutions and discuss practices regarding privacy data protection and enforcing rights in a changing world It is one of the results of the 14th annual International Conference on Computers Privacy and Data Protection CPDP which took place online in January 2021 The pandemic has produced deep and ongoing changes in how when why and the media through which we interact Many of these changes correspond to new approaches in the collection and use of our data new in terms of scale form and purpose This raises difficult questions as to which rights we have and should have in relation to such novel forms of data processing the degree to which these rights should be balanced against other poignant social interests and how these rights should be enforced in light of the fluidity and uncertainty of circumstances The book covers a range of topics such as digital sovereignty art and algorithmic accountability multistakeholderism in the Brazilian General Data Protection law expectations of privacy and the European Court of Human Rights the function of explanations DPIAs and smart cities and of course EU data protection law and the pandemic including chapters on scientific research and on the EU Digital COVID Certificate framework This interdisciplinary book has been written at a time when the scale and impact of data processing on society on individuals as well as on social systems is becoming ever starker It discusses open issues as well as daring and prospective approaches and is an insightful resource for readers with an interest in computers privacy and data protection **Online Education** Anthony G.
