The Dark Cloud Guillaume Pitron,2023-05-10 A gripping new investigation into the underbelly of digital technology which reveals not only how costly the virtual world is but how damaging it is to the environment A simple like sent from our smartphones mobilises what will soon constitute the largest infrastructure built by man This small notification crossing the seven operating layers of the Internet travels around the world using submarine cables telephone antennas and data centres going as far as the Arctic Circle It turns out that the dematerialised digital world essential for communicating working and consuming is much more tangible than we would like to believe Today it absorbs 10 per cent of the world s electricity and represents nearly 4 per cent of the planet s carbon dioxide emissions We are struggling to understand these impacts as they are obscured to us in the mirage of the cloud Some telling numbers If digital technology were a country it would be the third highest consumer of electricity behind China and the United States An email with a large attachment consumes as much energy as a lightbulb left on for one hour Every year streaming technology generates as much greenhouse gas as Spain close to 1 per cent of global emissions One Google search uses as much electricity as a lightbulb left on for up to two minutes All of humanity produces five exabytes of data per day equivalent to what we consumed from the very beginnings of the internet to 2003 an amount that would fill 10 million Blu ray discs which piled up would be as high as the Eiffel Tower At a time of the deployment of 5G connected cars and artificial intelligence The Dark Cloud the result of an investigation carried out over two years on four continents reveals the anatomy of a technology that is virtual only in name Under the guise of limiting the impact of humans on the planet it is already asserting itself as one of the major environmental challenges of the twenty first century **Swipe, like, vote** Marcus Bösch,Jolan Geusen,2025 *Kinh tế và dự báo* ,2021 **TikTok Algorithms 2025** Jordan Smith,2022-05-05 TikTok is a highly creative platform and it definitely rewards those who often create and post It s ideal two to three times a day if you

really want to gain popularity on TikTok you won't cut it once a week. So in just two months I've gone from zero to 10K followers. Sharn Rayment multimedia freelance producer. You definitely have to embrace and commit to using TikTok to the fullest extent possible to create a content backlog for the for you page. As for younger and older generations, TikTok has democratized creativity and social media. The app has the highest rate of follower engagement across 100,000 user profiles sampled in an Influencer Marketing Hub online research project. If marketers merely consider it as a dancing device and don't change their approach to include TikTok content, they'll be really bitter in a couple of years. Watching Instagram influencers repurpose Instagram content to TikTok at the start of lockdown shows the polished advertising on this site doesn't wash. We always noticed when Instagram stories came up, there was a trend for shorter, more digestible content. Yet TikTok proves that users can return for more when you get the form of content right. According to official figures from TikTok, its customers remain faithful and are starting to return to the app. In fact, 90% of users use the app several times a day. Overall, TikTok is asking us to reconsider the way our content is strategized. I do hope these tips give you some ideas on how to handle TikTok and the way you prepare and create your content in general.
