Research Handbook on University Rankings Hazelkorn, Ellen, Mihut, Georgiana, 2021-12-10 Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged It presents an in depth analysis that reflects the current state of research on rankings their influence and impact **University Rankings** Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties **University Rankings** William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan s higher education system It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan s higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia **Universitätskulturen - L'Université en perspective - The Future of the University** Peter Hayes, Jean El Gammal, 2014-03-15 Globalisierung Evaluation Exzellenz Angesichts der gro en Umw lzungen vor denen die Universit tslandschaften international stehen widmet sich das Jahrbuch des Frankreichzentrums 2011 den universit ren Strukturen in

Deutschland Frankreich und den USA Historische und zeitgenössische gesellschaftliche Herausforderungen für die Universitäten werden anhand von Fallstudien beleuchtet und gegenwärtigen Diskursen gegenübergestellt Dabei wird der Bogen geschlagen vom mittelalterlichen Erbe und der geschichtlichen Entwicklung der heutigen Universitätssysteme über die Veränderung studentischer Lebensstile und die Rolle der Universitäten für die Elitenbildung bis hin zu Reformen Evaluationen und Rankings aus US-amerikanischer und europäischer Sicht World University Rankings and the Future of Higher Education Downing, Kevin, Ganotice, Jr., Fraide A., 2016-10-06 Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today To attain their goals universities must adopt new strategies to achieve academic excellence World University Rankings and the Future of Higher Education is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions providing a thorough overview of the impacts of these rankings on educational quality Exploring the benefits and challenges of this system in a global context this book is ideally designed for academicians researchers students administrators and policy makers interested in the effects of university rankings in the education sector and beyond **Student Use of Rankings in National Magazines in the College Decision-making Process** Michele Howard McManus, 2002 College rankings are widely depicted as vital tools for making informed decisions about the college selection process Based on sales volume and the diversity of ratings currently in existence there is little doubt that rankings are big business and are undeniably here to stay On the other hand very little factual information is available about students' actual use of rankings in the college decision making process It is clear that rankings such as those published by US News World Report are now part of the landscape in our system of higher education However the problem is to establish the extent students use rankings and to determine user characteristics based on demographics and institutional type The paramount purpose of this research study is to determine the importance of college rankings in national magazines on students' institutional choice Analysis of data provided by the Cooperative Institutional Research Program CIRP provides a greater understanding of the impact of rankings on students' college decision making process Specific research questions for this study include 1 Do students perceive college rankings to be an important factor in selecting their institution of choice 2 Does the importance attached to rankings vary significantly when response patterns are examined between students attending ranked national universities and those schools that are not ranked 3 Does the importance attached to rankings vary significantly when response patterns are examined between students attending ranked national liberal arts colleges and those colleges that are not ranked 4 Does the importance attached to rankings vary significantly when response patterns are examined between students attending public or private national universities 5 Does the importance attached to college rankings in national magazines vary significantly when response patterns are examined by gender age place of residence distance from permanent home academic achievement financial status or ethnicity Utilizing two US News ranking categories a total of 40 institutions from

13 states in differing geographic regions were selected for this research Public and private institutions and ranked and unranked schools were included in this analysis In addition each of these colleges participated in the CIRP for fall 2000 For this study there are 14 541 first time full time freshmen represented in the sample Of these students 8827 attend national universities while 5714 are enrolled in liberal arts colleges The majority of students included in this study placed some level of importance on college rankings Ratings in newsmagazines are of particular importance to first time full time freshmen attending ranked private institutions In addition students who deem rankings as important are traditionally aged live on campus attend a school a significant distance from home and have a high level of financial status University Rankings, Diversity, and the New Landscape of Higher Education ,2019-02-18 University rankings are a relatively new phenomenon in higher education Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear rankings attempting to measure university performance beyond national borders No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world This book is written as part of the effort to better understand rankings and their effects on higher education A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector The Parent-School Board Feuds Gerard Giordano,2024-10-02 During the COVID 19 pandemic parents were able to observe their children in online classes They were surprised by classroom discussions and assignments related to gender race ethnicity and religion along with the policies that were guiding curricula tests technology athletics discipline safety transportation funding and numerous other aspects of schools Parents began giving their advice to their school boards but when they were ignored they disrupted meetings wrote editorials created blogs staged rallies and lobbied state officials They were hoping to attract media attention and acquire political power and were stunned by their success TheParent School Board Feuds Essential Steps by Parents to Improve Schools recounts parent school board feuding about controversial classroom topics such as gender and race their disagreements about school policies including those affecting tests technology athletics and discipline and the impact that parents had during the pandemic and continue to have today **Academic Quality Rankings of American Colleges and Universities** David S. Webster,1986 **College. Edu** Lisa Guernsey,2005-09 Breaking Ranks Colin Diver,2022-04-12 Some colleges

will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality
