EBOOK: Services Marketing: Integrating Customer Focus Across the Firm Alan Wilson, Valarie Zeithaml, Mary Jo Bitner, Dwayne Gremler, 2012-06-16 The Second European Edition of *Services Marketing Integrating Customer Focus Across the Firm* by Wilson Zeithaml Bitner and Gremler uniquely focuses on the development of customer relationships through quality service. Reflecting the increasing importance of the service economy, *Services Marketing* is the only text that put the customer's experience of services at the centre of its approach. The core theories, concepts and frameworks are retained and specifically the gaps model, a popular feature of the book. The text moves from the foundations of services marketing before introducing the gaps model and demonstrating its application to services marketing. In the second edition, the book takes on more European and International contexts to reflect the needs of courses, lecturers and students. The second edition builds on the wealth of European and International examples, cases and research in the first edition, offering more integration of European content. It has also been fully updated with the latest research to ensure that it continues to be seen as the text covering the very latest services marketing thinking. In addition, the cases section has been thoroughly examined and revised to offer a range of new case studies with a European and global focus. The online resources have also been fully revised and updated, providing an excellent package of support for lecturers and students.

Customer Service Allan Woods, Lesley Hebron, Sally Bradley, 2001 This text takes candidates through the NVQ award unit by unit, offering plenty of questions and exercises to reinforce knowledge and understanding. Scenario-based activities allow candidates to analyze and discuss customer service situations and practise their skills.

Classical Social Theory in Use Robert Bickel,2012-12-01 This book provides an introduction to classical social theory through discussion application and synthesis of the work of Karl Marx Emile Durkheim and George Herbert Mead Rather than merely summarizing and evaluating their continuing influence their ideas and ways of reasoning are applied in thoroughly developed fashion to contemporary issues and historical events of enduring importance In the process contributions of these three very different authors are used to complement each other and are eventually synthesized making clear that they can be melded into one multilevel even if tentative and rudimentary theoretical perspective The book is intended to systematically and compactly introduce the most useful concepts of the three classical theorists However new concepts are typically introduced as part of the narrative rather than in box text definitional fashion This is consistent with the books primary purpose to enable the reader to begin to think like Marx Durkheim and Mead especially insofar as their work can be synthesized into one point of view dealing with inter related macro level middle range and micro level social phenomena The section on Marx will be longer than the sections on Durkheim and Mead In part the length of the discussion of Marx s work is due to use of this section to begin introducing pertinent ideas of Durkheim and Mead
