

The background is a solid deep red. Overlaid on this are several concentric circles of varying sizes and colors. In the top center, there is a large circle with a red outer ring and a dark brown inner circle. To the left, there is a green circle with a yellow-orange inner circle. To the right, there is a dark brown circle with a yellow-orange inner circle. At the bottom center, there is a large blue circle with a dark brown inner circle. The text is centered over these elements.

MEDICINE

IN THE 20TH CENTURY

EDITED BY ROGER COOTER AND JOHN PICKSTONE

Medicine Twentieth Century Roger Cooter

Raffaella Di Napoli

Medicine Twentieth Century Roger Cooter:

Companion Encyclopedia of Medicine in the Twentieth Century Roger Cooter, John Pickstone, 2016-02 This book contains over forty authoritative essays focusing on the political economy of medicine and health understandings of the body and transformations of some of the theatres of medicine **Medicine in the Twentieth Century** Roger Cooter, John V. Pickstone, 2000 This book contains over forty authoritative essays focusing on the political economy of medicine and health understandings of the body and transformations of some of the theatres of medicine

Internationale Organisationen und ihre Zivilisierungsbestrebungen: Die Geschichte der Weltgesundheitsorganisation Klaas Dykmann, 2017

Internationale Organisationen handelten als globale Zivilisierer und führten in einem gewissen Maße imperiale Zivilisierungsbestrebungen fort so lautet die Kernthese dieses Buches Jedoch entwickelten auch nichtwestliche Staaten Zivilisierungsmissionen bzw trugen durch Erweiterungen und Neudefinitionen zu einer fortschreitenden Hybridisierung dieser bei In diesem Zusammenhang bietet die Weltgesundheitsorganisation ein besonders anschauliches Beispiel da ihr Politikbereich besonders stark kulturell geprägt ist

The Oxford Handbook of the History of Medicine Mark Jackson, 2011-08-25 The Oxford Handbook of the History of Medicine celebrates the richness and variety of medical history around the world In recent decades the history of medicine has emerged as a rich and mature sub discipline within history but the strength of the field has not precluded vigorous debates about methods themes and sources Bringing together over thirty international scholars this handbook provides a constructive overview of the current state of these debates and offers new directions for future scholarship There are three sections the first explores the methodological challenges and historiographical debates generated by working in particular historical ages the second explores the history of medicine in specific regions of the world and their medical traditions and includes discussion of the global history of medicine the final section analyses from broad chronological and geographical perspectives both established and emerging historical themes and methodological debates in the history of medicine **Gender, Race and the National Education Association** Wayne J. Urban, 2020-08-26 Urban presents the NEA in its historical context turning a fair and clear eye on this powerful and controversial organization and using this context to both criticize and commend The culmination of a three decade long study this unique volume presents an unusually thorough and much needed holistic view of the NEA **Through the Healing**

Glass John Stanislav Sadar, 2016-02-12 In the mid 1920s a physiologist a glass chemist and a zoo embarked on a project which promised to turn buildings into medical instruments The advanced chemistry of Vita Glass mobilised theories of light and medicine health practices and glassmaking technology to compress an entire epoch's hopes for a healthy life into a glass sheet yet it did so invisibly To communicate its advantage Pilkington Bros spared no expense as they launched the most costly and sophisticated marketing campaign in their history Engineering need for Vita Glass employed leading edge market research evocative photography and vanguard techniques of advertising psychology accompanied by the claim Let in the

Health Rays of Daylight Permanently through Vita Glass Windows This is the story of how despite the best efforts of two glass companies the leading marketing firm of the day and the opinions of leading medical minds Vita Glass failed However it epitomised an age of lightness and airiness sleeping porches flat roofs and ribbon windows Moreover through its remarkable print advertising it strove to shape the ideal relationship between our buildings and our bodies *Weimar Culture And Quantum Mechanics: Selected Papers By Paul Forman And Contemporary Perspectives On The Forman Thesis* Alexei B Kojevnikov, Cathryn Carson, Helmuth Trischler, 2011-05-11 This volume reprints Paul Forman's classic papers on the history of the scientific profession in post World War I Germany and the invention of quantum mechanics The Forman thesis became famous for its demonstration of the cultural conditioning of scientific knowledge in particular by showing the historical connection between the culture of Weimar Germany known for its irrationality and antisecularism and the emerging concept of quantum acausality From the moment of its publication Forman's research provoked intense historical and philosophical debates In 2007 participants at an international conference in Vancouver Canada discussed the implications of the Forman thesis for contemporary historiography Their contributions collected in this volume represent cutting edge research on the history of the quantum revolution and of German science **Bodies Politic** Roy Porter, 2021-03-08 In this historical tour de force Roy Porter takes a critical look at representations of the body in health disease and death in Britain from the mid seventeenth to the twentieth century Porter argues that great symbolic weight was attached to contrasting conceptions of the healthy and diseased body and that such ideas were mapped onto antithetical notions of the good and the bad the beautiful and the ugly With these images in mind he explores aspects of being ill alongside the practice of medicine paying special attention to self presentations by physicians surgeons and quacks and to changes in practitioners public identities over time Porter also examines the wider symbolic meanings of disease and doctoring and the body politic Porter's book is packed with outrageous and amusing anecdotes portraying diseased bodies and medical practitioners alike Medicine, Madness and Social History R. Bivins, J. Pickstone, 2007-06-15 Written in honour of eminent historian Roy Porter by twenty of his colleagues and students the collection renders cutting edge scholarship accessible Historians from the three fields that Porter made his own the histories of medicine madness and the Enlightenment illustrate his influence while tackling major themes ranging from disability rights to the popularization of science In their accounts artisan gardeners jostle with anarchists dentists and hypnotists in a lively and very Porterian parade The making of British bioethics Duncan Wilson, 2015-11-01 The making of British bioethics provides the first in depth study of how philosophers lawyers and other outsiders came to play a major role in discussing and helping to regulate issues that used to be left to doctors and scientists It details how British bioethics emerged thanks to a dynamic interplay between sociopolitical concerns and the aims of specific professional groups and individuals who helped create the demand for outside involvement and transformed themselves into influential ethics experts Highlighting this interplay helps us appreciate how issues such as embryo research

and assisted dying became high profile bioethical concerns in the late twentieth century and why different groups now play a critical role in developing regulatory standards and leading public debates The book draws on a wide range of original sources and will be of interest to historians of medicine and science general historians and bioethicists An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence [Transloyalties, Connected Histories and World Christianity during the Interwar Period](#) Frieder Ludwig, Ellen Veia Rosnes, Joar Haga, Marina Xiaojing Wang, Jairzinho Lopes Pereira, 2025-06-30 This book introduces the approach of transloyalties to study connected histories in World Christianity The term transloyalties is used to analyze the multifaceted processes in various contact zones through which cultural and religious identities were transformed in the tension between different loyalties The volume tests this approach in various case studies most of them focusing on Lutheran churches and World Lutheranism between 1919 and 1939 a time of rapidly changing political circumstances Traditionally the United States Germany and Scandinavia had been identified as the three centers of Lutheranism However while the structures in these centers were well established and World Lutheranism was something out there with limited impact back home negotiation processes on Lutheran identity were crucial in contexts where new Lutheran churches emerged Asian and African church leaders operated in a new context of loyalties They pushed for cooperation and they often interacted with mission organizations from all three centers and also with other religions traditional cultures and political movements Therefore it is significant what happened for instance in the Lutheran Church of China or at Umphumulo in South Africa Including theoretical reflections and case studies this volume is valuable reading for scholars of the history of World Christianity **Zugriffe auf das Ich** Magaly Tornay, 2016-08-26 Wie beeinflussen psychoaktive Stoffe unser Bild von uns selbst Entlang dieser Frage zeichnet Magaly Tornay die Geschichte psychoaktiver Stoffe in der Schweiz seit dem Aufkommen des LSD nach und zeigt auf wie zwischen Klinik Industrie und Wissenschaft ein neues Objekt Kontur gewann eine psychopharmakologische Grammatik die den Diskurs über psychische Störungen und Normen entscheidend mitprägte **Polio** David M. Oshinsky, 2005-04-12 Here David Oshinsky tells the gripping story of the polio terror and of the intense effort to find a cure from the March of Dimes to the discovery of the Salk and Sabin vaccines and beyond Drawing on newly available papers of Jonas Salk Albert Sabin and other key players Oshinsky paints a suspenseful portrait of the race for the cure weaving a dramatic tale centered on the furious rivalry between Salk and Sabin He also tells the story of Isabel Morgan perhaps the most talented of all polio researchers who might have beaten Salk to the prize if she had not retired to raise a family Oshinsky offers an insightful look at the National Foundation for Infantile Paralysis which was founded in the 1930s by FDR and Basil O Connor it revolutionized fundraising and the perception of disease in America Oshinsky also shows how the polio experience revolutionized the way in which the government licensed and tested new drugs before allowing them on the market and the way in which the legal system dealt with manufacturers liability for unsafe products Finally and perhaps most tellingly Oshinsky reveals that polio was never the raging epidemic

portrayed by the media but in truth a relatively uncommon disease But in baby booming America increasingly suburban family oriented and hygiene obsessed the specter of polio like the specter of the atomic bomb soon became a cloud of terror over daily life Both a gripping scientific suspense story and a provocative social and cultural history Polio opens a fresh window onto postwar America *Vaccination in America* Richard J. Altenbaugh, 2018-08-02 The success of the polio vaccine was a remarkable breakthrough for medical science effectively eradicating a dreaded childhood disease It was also the largest medical experiment to use American schoolchildren Richard J Altenbaugh examines an uneasy conundrum in the history of vaccination even as vaccines greatly mitigate the harm that infectious disease causes children the process of developing these vaccines put children at great risk as research subjects In the first half of the twentieth century in the face of widespread resistance to vaccines public health officials gradually medicalized American culture through mass media public health campaigns and the public education system Schools supplied tens of thousands of young human subjects to researchers school buildings became the main dispensaries of the polio antigen and the mass immunization campaign that followed changed American public health policy in profound ways Tapping links between bioethics education public health and medical research this book raises fundamental questions about child welfare and the tension between private and public responsibility that still fuel anxieties around vaccination today **On Their Own Terms** Benjamin A. Elman, 2009-07-01 Since the mid 19th century imperial reformers Republicans Guomindang party cadres and Communists have all prioritized science and technology Elman offers an account of the evolution of native Chinese science over four centuries under the influence of missionaries In the end he argues the Chinese produced modern science on their own terms **Locating Medical History** Frank Huisman, John Harley Warner, 2006-10-31 The issues constituting the history of medicine are consequential how societies organize health care how individuals or states relate to sickness how we understand our own identity and agency as sufferers or healers In *Locating Medical History The Stories and Their Meanings* Frank Huisman John Harley Warner and other eminent historians explore and reflect on a field that accommodates a remarkable diversity of practitioners and approaches At a time when medical history is facing profound choices about its future these scholars explore the discipline in the distant and recent past in order to rethink its missions and methods today They discuss such issues as the periodic estrangement of medical history from medicine the influence of Foucault on the writing of medical history and the shifts from social to cultural history and back again Chapters explore the early history of the field its transformations since the 1970s and its prospects for the future With diverse constituencies a multiplicity of approaches styles and aims is both expected and desired This volume locates medical history within itself and within larger historiographic trends to provide a springboard for discussions about what the history of medicine should be and what aims it should serve Contributors Olga Amsterdamska University of Amsterdam Warwick Anderson University of Wisconsin Madison Allan M Brandt Harvard Medical School Theodore M Brown University of Rochester Roger Cooter University College London

richtig! Anja Laukötter, 2021-03-29 Wie haben bewegte Bilder Einstellungen und Verhalten der Menschen in unserer
globalen Mediengesellschaft beeinflusst Sexualaufklärungsfilme versuchten über das gesamte 20. Jahrhundert hinweg
Einstellungen und Verhalten der Menschen zu formen Sie zirkulierten ins europäische Ausland in die USA und zurück Ihr
visueller und epistemologischer Referenzrahmen waren die Wissenschaften der Medizin Pädagogik und Psychologie was sich
auch in der Zuschauerforschung spiegelte Im Namen der Gesundheit des Körpers wurden stets Gefühle eingesetzt doch die
emotionale Kultur veränderte sich Im Ersten Weltkrieg sollte Wissen über Syphilis Angst erzeugen und so Soldaten von
ungesicherten Sexualkontakten abhalten Im Weimarer Kino wurde die Bevölkerung gegen eine falsche Scham mobilisiert Im
Frontkino des Nationalsozialismus wurde die Angst durch ein unbedingtes Vertrauen ersetzt Während der Besatzungszeit
wurde Verständnis gefordert gerade für die junge Generation Diese sollte dann durch positive Emotionen in der DDR zur
sozialistischen Persönlichkeit erzogen in der BRD zur Selbstführung befähigt werden Die AIDS Bekämpfung lie die Gefühle mit
dem zu vermittelnden Wissen verschmelzen So erzählt die Geschichte des Sexualaufklärungsfilms nicht nur von der
Konstituierung sondern auch von der Steuerung einer globalen Mediengesellschaft Ausgezeichnet mit dem Otto Hintze Preis

The Transformation of the Psyche in British Primary Care, 1880-1970

Rhodri Hayward, 2014-02-25 Conflicting models of selfhood have become central to debates over modern medicine Yet we
still lack a clear historical account of how this psychological sensibility came to be established The Transformation of the
Psyche in British Primary Care 1880-1970 will remedy this situation by demonstrating that there is nothing inevitable about
the current connection between health identity and personal history It traces the changing conception of the psyche in
Britain over the last two centuries and it demonstrates how these changes were rooted in transformed patterns of medical
care The shifts from private medicine through to National Insurance and the National Health Service fostered different kinds
of relationship between doctor and patient and different understandings of psychological distress The Transformation of the
Psyche in British Primary Care 1880-1970 examines these transformations and in so doing provides new critical insights into
our modern sense of identity and changing notions of health that will be of great value to anyone interested in the modern
history of British medicine

Health Care in America John C. Burnham, 2015-05-15 This comprehensive history of

medicine and public health in America covers changes and developments over four centuries from the arrival of the first Europeans to the twenty first century The Politics of Wounds Ana Carden-Coyne, 2014-10-02 The Politics of Wounds explores military patients experiences of frontline medical evacuation war surgery and the social world of military hospitals during the First World War The proximity of the front and the colossal numbers of wounded created greater public awareness of the impact of the war than had been seen in previous conflicts with serious political consequences Frequently referred to as our wounded the central place of the soldier in society as a symbol of the war s shifting meaning drew contradictory responses of compassion heroism and censure Wounds also stirred romantic and sexual responses This volume reveals the paradoxical situation of the increasing political demand levied on citizen soldiers concurrent with the rise in medical humanitarianism and war related charitable voluntarism The physical gestures and poignant sounds of the suffering men reached across the classes giving rise to convictions about patient rights which at times conflicted with the military s pragmatism Why then did patients represent military medicine doctors and nurses in a negative light The Politics of Wounds listens to the voices of wounded soldiers placing their personal experience of pain within the social cultural and political contexts of military medical institutions The author reveals how the wounded and disabled found culturally creative ways to express their pain negotiate power relations manage systemic tensions and enact forms of soft resistance against the societal and military expectations of masculinity when confronted by men in pain The volume concludes by considering the way the state ascribed social and economic values on the body parts of disabled soldiers through the pension system
