Graff,2016-03-10 This book is a comparative study of military practice in Sui Tang China and the Byzantine Empire between approximately 600 and 700 CE It covers all aspects of the military art from weapons and battlefield tactics to logistics campaign organization military institutions and the grand strategy of empire Whilst not neglecting the many differences between the Chinese and Byzantines this book highlights the striking similarities in their organizational structures tactical deployments and above all their extremely cautious approach to warfare It shows that contrary to the conventional wisdom positing a straightforward Western way of war and an Oriental approach characterized by evasion and trickery the specifics of Byzantine military practice in the seventh century differed very little from what was known in Tang China It argues that these similarities cannot be explained by diffusion or shared cultural influences which were limited but instead by the need to deal with common problems and confront common enemies in particular the nomadic peoples of the Eurasian steppes Overall this book provides compelling evidence that pragmatic needs may have more influence than deep cultural imperatives in determining a society's way of war

Chinese Esoteric Buddhism Geoffrey C. Goble, 2019-10-08

Chinese Esoteric Buddhism is generally held to have been established as a distinct and institutionalized Buddhist school in eighth century China by the Three Great Masters of Kaiyuan ubh karasi ha Vajrabodhi and Amoghavajra Geoffrey C Goble provides an innovative account of the tradition s emergence that sheds new light on the structures and traditions that shaped its institutionalization Goble focuses on Amoghavajra 704 774 contending that he was the central figure in Esoteric Buddhism s rapid rise in Tang dynasty China and the other two patriarchs are known primarily through Amoghavajra s teachings and writings He presents the scriptural mythological and practical aspects of Chinese Esoteric Buddhism in the eighth century and places them in the historical contexts within which Amoghavajra operated By telling the story of Amoghavajra s rise to prominence and of Esoteric Buddhism s corresponding institutionalization in China Goble makes the case that the evolution of this tradition was predicated on Indic scriptures and practical norms rather than being the product of conscious adaptation to a Chinese cultural environment He demonstrates that Esoteric Buddhism was employed by Chinese rulers to defeat military and political rivals Based on close readings of a broad range of textual sources previously untapped by English language scholarship this book overturns many assumptions about the origins of Chinese Esoteric Buddhism

Graff, Robin Higham, 2012-04-13 Gaining an understanding of China s long and sometimes bloody history can help to shed light on China s ascent to global power Many of China s imperial dynasties were established as the result of battle from the chariot warfare of ancient times to the battles of the Guomindang KMT and Communist regimes of the twentieth century China s ability to sustain complex warfare on a very large scale was not emulated in other parts of the world until the Industrial Age despite the fact that the country is only now rising to economic dominance In *A Military History of China* Updated Edition David A Graff and Robin Higham bring together leading scholars to offer a basic introduction to the military history of China from the first millennium B C E to the present Focusing on recurring patterns of

conflict rather than traditional campaign narratives this volume reaches farther back into China's military history than similar studies. It also offers insightful comparisons between Chinese and Western approaches to war. This edition brings the volume up to date including discussions of the Chinese military's latest developments and the country's most recent foreign conflicts.
