2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African

Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates

Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it

is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising

business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment **1st World Conference on Biomass for Energy and Industry** Spyros Kyritsis,2001 The 1st World Conference and Technology Exhibition on Biomass for Energy and Industry held in Sevilla in June 2000 brought together for the first time the traditional European Conference on Biomass for Energy and Industry and the Biomass Conference of the Americas thus creating the largest and most outstanding event in the worldwide biomass sector The conference elaborated innovative global strategies projects and efficient practice rules for energy and the environment at a key stage in the industry s development New concepts and projects were highlighted to increase the social and political awareness for a change in worldwide resource consumption and to promote economically socially and environmentally sustainable development for the next millennium In 2 volumes the Proceedings include some 470 papers essential to an understanding of current thinking practice research and global developments in the biomass sector a vital reference source for researchers manufacturers and policy makers involved or interested in the use of biomass for energy and industry **Society Conference on Energy Management** William J.
