Dennys]. Stereotyped ed., by E.N. Dennys. Revised* Edward Nichols Dennys,1868 **The Alpha, or first principle of the human mind: a philosophical inquiry into the nature of truth** Edward Nichols DENNYS,1871

Evolution and Culture Stephen C. Levinson,Pierre Jaisson,2006 Twelve original essays examine the symbiotic relation of culture and genome **Elements of the Philosophy of the Human Mind** Dugald Stewart,1843 **Essays on the Intellectual Powers of the Human Mind to which are Added an Essay on Quantity and an Analysis of Aristoteles Logic** Thomas Reid,1827 **Elements of the philosophy of the human mind ... To which is prefixed introduction and part first of the Outlines of moral philosophy. 1854** Dugald Stewart,1877 Essays on the Powers of the Human Mind Thomas Reid,1827 **Essays on the Powers of the Human Mind i.e. "Essays on the Intellectual Powers of Man" and "Essays on the Active Powers of Man." ... Tweyman,2012-12-06 In the pages that follow an attempt is made to examine those sections of the Dialogues Concerning Natural Religion which deal with the Argument from Design the argument which purports to prove that certain observed similarities between the design of the world and machines of human contrivance countenance reasoning by analogy to the conclusion that the cause of the design of the world resembles human intelligence The sections which deal with the Argument from Design and with which I am therefore concerned are Parts I through VIII and Part XII I argue that a clue to Hume s discussion of the Argument from Design is to be found in Section XII of the first Enquiry in which Hume presents his most thorough analysis of philosophic dogmatism and scepticism The Dialogues as will be shown follows precisely Hume s recommendations in this Section for bringing the dogmatist to the position which Hume himself endorses mitigated scepticism It is then the position of the mitigated sceptic which is elaborated in Part XII of the Dialogues The belief in an intelligent designer of the world is shown to be akin to certain other beliefs discussed by Hume causality physical objects a continuing self which are usually referred to in the literature as natural beliefs The mitigated sceptic s defense of the unknowability of the divine nature is seen to be in accordance with Hume s view that whatever is believed naturally cannot be known or understood **An Introduction to Design**

Arguments Benjamin C. Jantzen,2014-02-27 The history of design arguments stretches back to before Aquinas who claimed that things which lack intelligence nevertheless act for an end to achieve the best result Although science has advanced to discredit this claim it remains true that many biological systems display remarkable adaptations of means to ends Versions of design arguments have persisted over the centuries and have culminated in theories that propose an intelligent designer of the universe This volume is the only comprehensive survey of 2 000 years of debate drawing on both historical and modern literature to identify clarify and assess critically the many forms of design argument for the existence of God It provides a neutral informative account of the topic from antiquity to Darwin and includes concise primers on probability and cosmology It will be of great value to upper level undergraduates and graduates in philosophy of religion theology and philosophy of science

The Equality of Flesh Brent Dawson,2024-06-15 The Equality of Flesh traces a new genealogy of equality before its formalization under liberalism While modern ideas of equality are defined through an inner human nature Brent Dawson argues that the sixteenth and seventeenth centuries conceptualized equality as an ambivalent and profoundly bodily condition Everyone was made from the same lowly matter and as a result shared the same set of vulnerabilities needs and passions Responding to the political upheavals of colonialism and the intellectual turmoil of new natural philosophies leading figures of the English Renaissance including Edmund Spenser and William Shakespeare anxiously imagined that bodily commonality might undermine differences of religion race and class As the period progressed later authors developed the revolutionary possibilities of bodily equality even as new ideas of fixed racial inequality emerged Some like the utopian radical Gerrard Winstanley and the republican poet John Milton challenged political absolutism through the idea of humans as base embodied creatures Others like the heterodox philosopher Margaret Cavendish the French theologian Isaac La Peyrre and the libertine Cyrano de Bergerac offered limited yet important interrogations of racial paradigms This moment Dawson shows would pass as bodily equality was marginalized in the liberal theories of John Locke and Thomas Hobbes In its place during the Enlightenment pseudoscientific racism would come to anchor inequality in the body Contending with the lasting implications of material equality for modernity *The Equality of Flesh* shows how increasingly vehement notions of racial difference eclipsed a nascent sense of human commonality rooted in the basic stuff of life
