Science Experiments Today Returns:

Returning to Scientific Practice Xu Zhu, Wu Tong, 2019-05-17 This book is a result from a collective study on philosophy of scientific practice PSP which began around 2002 and still ongoing There is an apparently increasing interest in scientific practice influenced by the historicistic philosophy of science and the sociology of scientific knowledge SSK Prof WU Tong and his research group believe that it is necessary for PSP to turn from the theory dominant position to the practice dominance PSP has also put forward the possibility of reinterpreting the epistemic status of local knowledge in Chinese tradition which provides the most significant motivation to participate this study In this book we have selected three main cases namely Chinese medicine Fengshui and Ethnobotany to examine the effect of PSP The aim of our collective study is not merely on theoretical construction of PSP but also to consider the various applications of PSP especially for re interpreting and demonstrating the variety of local knowledge from traditional China which seems to be a genuine contribution to the international enterprise of philosophy of science particularly made by Chinese scholars

The Return of Nature John Bellamy Foster, 2020-06-16

Return to Meaning Mats Alvesson, Yiannis Gabriel, Roland Paulsen, 2017-06-23 This book argues that we are currently witnessing not merely a decline in the quality of social science research but the proliferation of meaningless research of no value to society and modest value to its authors apart from securing employment and promotion The explosion of published outputs at least in social science creates a noisy cluttered environment which makes meaningful research difficult as different voices compete to capture the limelight even briefly Older more significant contributions are easily neglected as the premium is to write and publish not read and learn The result is a widespread cynicism among academics on the value of academic research sometimes including their own Publishing comes to be seen as a game of hits and misses devoid of intrinsic meaning and value and of no wider social uses whatsoever Academics do research in order to get published not to say something socially meaningful This is what we view as the rise of nonsense in academic research which represents a serious social problem It undermines the very point of social science This problem is far from academic It affects many areas of

social and political life entailing extensive waste of resources and inflated student fees as well as costs to tax payers Part two of the book offers a range of proposals aimed at restoring meaning at the heart of social research and drawing social science back address the major problems and issues that face our societies **Japan's Changing Role** United States.
