Artificial Intelligence-Enabled Digital Twin for Smart Manufacturing Amit Kumar Tyagi, Shrikant Tiwari, Senthil Kumar Arumugam, Avinash Kumar Sharma, 2024-10-15

An essential book on the applications of AI and digital twin technology in the smart manufacturing sector In the rapidly evolving landscape of modern manufacturing the integration of cutting edge technologies has become imperative for businesses to remain competitive and adaptive Among these technologies Artificial Intelligence AI stands out as a transformative force revolutionizing traditional manufacturing processes and making the way for the era of smart manufacturing At the heart of this technological revolution lies the concept of the Digital Twin an innovative approach that bridges the physical and digital realms of manufacturing By creating a virtual representation of physical assets processes and systems organizations can gain unprecedented insights optimize operations and enhance decision making capabilities This timely book explores the convergence of AI and Digital Twin technologies to empower smart manufacturing initiatives Through a comprehensive examination of principles methodologies and practical applications it explains the transformative potential of AI enabled Digital Twins across various facets of the manufacturing lifecycle From design and prototyping to production and maintenance AI enabled Digital Twins offer multifaceted advantages that redefine traditional paradigms By leveraging AI algorithms for data analysis predictive modeling and autonomous optimization manufacturers can achieve unparalleled levels of efficiency quality and agility This book explains how AI enhances the capabilities of Digital Twins by creating a powerful tool that can optimize production processes improve product quality and streamline operations Note that the Digital Twin in this context is a virtual representation of a physical manufacturing system including machines processes and products It continuously collects real time data from sensors and other sources allowing it to mirror the physical system s behavior and performance What sets this Digital Twin apart is the incorporation of AI algorithms and machine learning techniques that enable it to analyze and predict outcomes recommend improvements and autonomously make adjustments to enhance manufacturing efficiency This book outlines essential elements like real time monitoring of machines predictive analytics of machines and data optimization of the resources quality control of the product resource management decision support timely or quickly accurate decisions Moreover this book elucidates the symbiotic relationship between AI and Digital Twins highlighting how AI augments the capabilities of Digital Twins by infusing them with intelligence adaptability and autonomy Hence this book promises to enhance competitiveness reduce operational costs and facilitate innovation in the manufacturing industry By harnessing AI s capabilities in conjunction with Digital Twins manufacturers can achieve a more agile and responsive production environment ultimately driving the evolution of smart factories and Industry 4 0 5 0
