Proper, Luise Pufahl, Dimka Karastoyanova, Marten van Sinderen, 2024-03-01 This volume constitutes revised selected papers of several workshops the EDOC Forum and the Demonstrations and Doctoral Consortium track which were held in conjunction with the 27th International Conference on Enterprise Design Operations and Computing EDOC 2023 in Groningen The Netherlands during October 30 November 3 2023 The 18 revised full papers and 7 short papers presented in this book were carefully reviewed and selected from 37 submissions They stem from the following satellite events Workshop on Intelligent Digital Architecture Methods and Services for Industry 4 0 and Society 5 0 IDAMS Workshop on Empirical Methodologies for Research in Enterprise Architecture and Service Oriented Computing iRESEARCH Workshop on the Modelling and Implementation of Digital Twins for Complex Systems MIDas4CS Workshop on Service oriented Enterprise Architecture for Enterprise Engineering SoEA4EE EDOC Forum Demonstrations Track Doctoral Consortium

Generative AI and Creativity Elakkiya Rajasekar, Subramaniaswamy V, 2025-11-25 Generative AI and Creativity From Theory to Practice is an immersive exploration into the revolutionary domain of generative artificial intelligence It takes a step by step journey starting with the fundamentals of generative AI and progressing to advanced applications The book

unravels the complexities of generative models delving into key techniques such as generative adversarial networks GANs and variational autoencoders VAE s providing a solid foundation for readers to understand the underlying principles

FEATURES Explores the collaboration between humans and AI in creative processes Examines generative art movements graphic design applications and artist AI collaborations Defines creativity in AI by showcasing case studies and discussing ethical considerations Moving beyond creative content generation in art and music to practical implementations in industries like healthcare and finance the book showcases the versatility and transformative potential of generative AI across diverse domains Readers will gain practical skills through coding examples case studies and collaborative projects empowering them to integrate generative AI into their own work The book is enriched with stories of innovation featuring pioneers who have leveraged generative AI to push the boundaries of creativity Ethical considerations and the societal impact of generative AI are also explored to foster a holistic understanding of the technology

Artificial Intelligence in Design '91 J. S. Gero, 2014-05-23 Artificial Intelligence in Design 91 is a collection of 47 papers from the First International Conference on Artificial Intelligence in Design held at Edinburgh in June 1991 The papers in this book are grouped into 13 headings starting with a background of AI design systems and to which extent AI that results from being used as planning tool be applied to quality oriented design processes in architecture A constraint driven approach to object oriented design is also shown on real world objects The use of CADSYN in the structural design of buildings is examined along with design dependent knowledge and design independent knowledge Discussions on empowering designers with integrated design environments are given whereby design objects may be retrieved from catalogues without requiring users to form queries Mention is given to automated adjustment of parameter values frequently used in computer routine applications The book also introduces the Computer Aided Design CAD as applied to architecture Design representation using data models non monotonic reasoning in design and the cognitive aspects of design using empirical studies are discussed Topics of the industrial applications of AI in design such as the needed steps to develop a successful AI based tool and a review of the Castlemain Project and telecommunication distribution networks follow This book is suitable for programmers computer science students and architects and engineers who use computers in their line of work

Integrating AI Techniques into the Design and Development of Smart Cyber-Physical Systems D. Jeya Mala, Anto Cordelia Tanislaus Antony Dhanapal, Saurav Sthapit, Anita Khadka, 2025-06-30 Building on the knowledge of risks vulnerabilities and safety measures associated with cyber physical systems this book focuses on adapting artificial intelligence AI techniques to smart cyber physical systems application development The future is going to see cyber physical systems in almost every aspect of life so a book that focuses on shedding light on the design development and security aspects of cyber physical systems in more crucial domains such as defense healthcare biomedical smart city applications is needed Integrating AI Techniques into the Design and Development of Smart Cyber Physical Systems Defense Biomedical Infrastructure and Transportation offers an introductory exploration of

the fundamental theories and concepts of AI and machine learning ML that are utilized in the building of dependable cyber physical systems It brings the ideas of advanced design and development and empowered security measures to cyber physical systems By focusing on the application of AI in cyber physical systems design as well as security aspects an improvement in reliability and advancements can be explored Also included are the latest findings and advancements as well as case studies and illustrative examples on the design and development of smart cyber physical systems This resource is highly valuable for those employed in educational institutions research laboratories enterprises and government agencies as well as for students seeking novel ideas in the realm of smart cyber physical systems design

Artificial Intelligence-Aided Design for Sustainability Maycon Sedrez,Gregory Pitts,2025-11-20 Artificial Intelligence is reshaping the architecture and design disciplines transforming how we design think and teach This volume explores how AI is becoming not just a powerful digital tool but an active partner in the creation of more sustainable adaptive and forward thinking design processes

Focusing on the intersection of design sustainability and emerging technologies this book investigates how AI contributes to the resilience of the architectural profession supports the United Nations Sustainable Development Goals SDGs and drives educational innovation aligned with the UNESCO 2019 Beijing Consensus Across the book chapters leading researchers explore new workflows where AI enhances design development enables complex analysis and redefines creative roles The book also examines hybrid analogue digital practices and the adoption of computational concepts in design revealing how architects are adapting to a deeply digitised future Organised around three central themes AI for sustainable design the evolving role of the architect and innovation in education this volume is essential reading for designers educators and researchers navigating the shifting landscape of architecture in the age of intelligent systems Part of Springer s Urban Sustainability series AI Aided Design for Sustainability offers critical insight into the tools mindsets and methods shaping contemporary architecture

Computer-Aided Architectural Design Futures Alan Pipes,2014-05-20 Computer Aided Architectural Design Futures contains the proceeding of the International Conference on Computer Aided Architectural Design held at Department of Architecture Technical University of Delft The Netherlands on September 18 19 1985

Organized into four parts the book underlines concepts on computer aided architectural design These include systematic design drawing and visualization artificial intelligence and knowledge engineering and implications for practice This book will be a major reference text for students researchers and practitioners

Using Traditional Design Methods to Enhance AI-Driven

Decision Making Nguyen, Tien V. T.,Vo, Nhut T. M.,2024-01-10 In the rapidly evolving landscape of industrial activities artificial intelligence AI has emerged as a powerful force driving transformative change Among its many applications AI has proven to be instrumental in reducing processing costs associated with optimization challenges The intersection of AI with optimization and multi criteria decision making MCDM techniques has led to practical solutions in diverse fields such as manufacturing transportation finance economics and artificial intelligence Using Traditional Design Methods to Enhance AI Driven Decision Making delves into a wide array of topics related to optimization decision making and their applications Drawing on foundational contributions system developments and innovative techniques the book explores the synergy between traditional design methods and AI driven decision making approaches The book is ideal for higher education faculty and administrators students of higher education librarians researchers graduate students and academicians Contributors are invited to explore a wide range of topics including the role of AI driven decision making in leadership trends in AI driven decision making in Industry 5.0 applications in various industries such as manufacturing transportation healthcare and banking services as well as AI driven optimization in mechanical engineering and materials

Artificial Intelligence in Music, Sound, Art and Design Colin Johnson,Sérgio M. Rebelo,Iria Santos,2024-03-29 This book constitutes the refereed proceedings of the 13th International Conference on Artificial Intelligence in Music Sound Art and Design EvoMUSART 2024 held as part of EvoStar 2024 in Aberystwyth UK April 3-5 2024 The 17 full papers and 8 short papers presented in this book were carefully reviewed and selected from 55 submissions The main purpose of this conference proceedings was to bring together practitioners who are using Artificial Intelligence techniques for artistic tasks providing the opportunity to promote present and discuss ongoing work in the area

Design for Tomorrow—Volume 1 Amaresh Chakrabarti,Ravi

Poovaiah,Prasad Bokil,Vivek Kant,2021-04-26 This book showcases cutting edge research papers from the 8th International Conference on Research into Design ICoRD 2021 written by eminent researchers from across the world on design processes

technologies methods and tools and their impact on innovation for supporting design for a connected world The theme of ICoRD 21 has been Design for Tomorrow The world as we know it in our times is increasingly becoming connected In this interconnected world design has to address new challenges of merging the cyber and the physical the smart and the mundane the technology and the human As a result there is an increasing need for strategizing and thinking about design for a better tomorrow The theme for ICoRD 21 serves as a provocation for the design community to think about rapid changes in the near future to usher in a better tomorrow The papers in this book explore these themes and their key focus is design for tomorrow how are products and their development be addressed for the immediate pressing needs within a connected world The book will be of interest to researchers professionals and entrepreneurs working in the areas on industrial design manufacturing consumer goods and industrial management who are interested in the new and emerging methods and tools for design of new products systems and services

Artificial Intelligence in Education Ben Du Boulay,R. Mizoguchi,1997 The theme of this book is Knowledge and Media in Learning Systems and papers that explore the emerging roles of intelligent multimedia and distributed technologies as well as computer supported collaboration within that theme are included The spread of topics is very wide encompassing both well established areas such as student modelling as well as more novel topics such as distributed intelligent tutoring on the World Wide Web Far from undermining the need to understand how learning and teaching interact the newer media continue to emphasise the interdependence of these two processes Collaboration and tools for collaboration are the major topics of interest Understanding how human learners collaborate how peer tutoring works and how the computer can play a useful role as either a more able of even a less able learning partner are all explored here

International Conference on Civil Engineering Innovative Development in Engineering Advances (ICC IDEA - 2025), Volume 4 Mohammed Alias Yusof,Sreevalsa Kolathayar,S. Durgadevagi,R. Ramasubramani,2025-12-02 This book presents select proceedings from the International Conference on Civil Engineering Innovative Development in Engineering Advances ICC IDEA 2025 highlighting holistic innovations in civil engineering for sustainable and smart infrastructure development It covers breakthrough technologies and integrated approaches aimed at enhancing the sustainability resilience and intelligence of modern infrastructure Topics include smart cities eco friendly construction practices renewable energy integration advanced materials and digital solutions such as Internet of Things IoT and Building Information Modeling BIM for optimizing infrastructure performance The book also explores sustainable urban planning green infrastructure and strategies for reducing the environmental footprint of civil engineering projects It serves as a valuable resource for students researchers and professionals involved in civil engineering urban development and smart infrastructure planning
